Valencia details why and how Mexican American parents and their children have been forced to resort to legal action. *Chicano Students and the Courts* engages the many areas that have spurred Mexican Americans to legal battle including school segregation, financing, special education, bilingual education, school closures, undocumented students, higher education financing, and high stakes testing, ultimately situating these legal efforts in the broader scope of the Mexican American community's overall struggle for the right to an equal education. Extensively researched and written by an author with firsthand experience in the courtroom as an expert witness in Mexican American education cases, this volume is the first to provide an in-depth understanding of the intersection of litigation and education vis-à-vis Mexican Americans.

Research Questions in Language Education and Applied Linguistics Hassan Mohebbi, Christine Coombe, 2022-01-13 This volume encompasses the range of research questions on language-related problems that arise in language teaching, learning, and assessment. The 150 chapters are written by experts in the field who each offer their insights into current and future directions of research and who suggest several highly relevant research questions. Topics include but are not limited to: language skills, teaching language skills, assessment and testing, measurement, feedback, discourse analysis, pragmatics, semantics, language learning through technology, CALL, MALL, ESP, EAP, ERPP, TBLT, materials development, genre analysis, needs analysis, corpus, content-based language teaching, language teaching and learning strategies, individual differences, research methods, classroom research, form-focused instruction, age effects, literacy, proficiency, and teacher education and teacher development. The book serves as a reference and offers inspiration to researchers and students in language education. An important skill in reviewing the research literature is following a study's plan of attack. Broadly, this means that before accepting and acting upon the findings, one considers: a) the research question: Is it clear and focused? Measurable? b) the subjects examined, the methods deployed, and the measures chosen: Do they fit the study's goal and have the potential to yield useful results? and c) the analysis of the data: Do the data lead to the discussion presented? Has the author reasonably interpreted results to reach the conclusion? Mohebbi and Coombe's book *Research Questions in Language Education and Applied Linguistics: A Reference Guide* helps budding researchers take the first step and develop a solid research question. As the field of language education evolves, we need continual research to improve our instructional and assessment practices and our understanding of the learners' language learning processes. This book, with its remarkable 150 topics and 10 times the number of potential research questions, provides a wealth of ideas that will help early career researchers conduct studies that move our field forward and grow our knowledge base.

Deborah J. Short, Ph.D., Director, Academic Language Research Training, Past President, TESOL International Association, 2021-22 As a teacher in graduate programs in TESOL, I frequently come across the frustration of students at centering their research interests on a particular topic and developing research questions which are worth pursuing so as to make a contribution to the field. This frustration stems from the fact that our field is so vast and interrelated that it is often impossible to properly address all that interests them. Hence, I wholeheartedly

welcome this most relevant and innovative addition to the research literature in the field of TESOL and Applied Linguistics Coombe and Mohebbi have created a real tour de force that stands to inform budding researchers in the field for many years to come Additionally the cutting edge depiction of the field and all it has to offer will no doubt update the research agendas of many seasoned researchers around the world The 150 chapters are organized in a most powerful yet deceptively simple way offering a positioning within the topic suggesting questions that might direct inquiry and offering a basic set of bibliographic tools to start the reader in the path towards research What is more the nine sections in which the chapters are organized leave no area of the field unexplored Dr Gabriel D az Maggioli Academic Advisor Institute of Education Universidad ORT del Uruguay President IATEFL Chapter Metacognition in Academic Writing Learning Dimensions is available open access under a Creative Commons Attribution 4 0 International License via link [springer.com](https://www.springer.com) **Exam Copy**
