Biomes

Biomes are large areas in the world with a certain climate. Climate is another word for weather and temperature. The climate of each biome decides what types of animals and plants can live in that area. The climate of the tundra biome is very cold all year long. Many trees cannot live in the tundra biome, but animals like polar bears can.

Another kind of biome is a desert. It is the driest biome. Only a few plants and animals can live in the desert. The desert biome gets less than 10 inches of rain each year. The world can be divided up into just six biomes or all the way up to seventeen biomes. There are even biomes in the water called aquatic biomes.
