Text In Context Essay Examples:

Text in Context A. D. H. Mayes, 2000-09-07 The scholarly study of the Old Testament is now marked by a rich diversity of approaches and concerns In the last two decades an interest in the text and the implications for its interpretation is no longer the preserve of a single scholarly community while the reconstruction of the history of the people from whom it derived has been transformed by new methods This new book published under the auspices of the Society for Old Testament Study reflects these new approaches and developments and has a particular concentration on literary and historical study Thus it not only clearly recognizes the diversity now inherent in Old Testament study but also welcomes the integration into its field of the wide range of approaches available in current literary and historical investigation The study of the biblical text and how it is received and interpreted by its various readerships has a certain logical priority over the study of its historical background and authorship Yet an ongoing investigation of issues relating to the latter cannot await definitive conclusions on the former So essays on the text and its reception discuss primary issues which arise in Old Testament study while those on background and authorship reflect the continued vitality of and the fresh perspective possible in more traditional scholarly concerns

Reading Religion in Text and Context Elisabeth Arweck, Peter Jeffrey Collins, 2006 To what extent is religion inherently textual What might the term textual mean in relation to religious faith and practice These are the two key questions addressed by the eleven thought provoking essays collected in this volume Accounts of the content and structure of sacred texts are commonplace The rather more adventurous aim of this book is to disclose within the context of religion the various ways in which meaning can be read of more or less obviously sacred writing and from discourses such as the body the built and natural environment drama and ritual

Writing in Context(s) Triantafillia Kostouli, 2006-01-20 The premise that writing is a socially situated act of interaction between readers and writers is well established This volume first corroborates this premise by citing pertinent evidence through the analysis of written texts and interactive writing contexts and from educational settings across different cultures from which we have scant evidence Secondly all chapters though addressing the social nature of writing propose a variety of perspectives making the volume multidisciplinary in nature Finally this volume accounts for the diversity of the research perspectives each chapter proposes by situating the plurality of terminological issues and methodologies into a more integrative framework Thus a coherent overall framework is created within which different research strands i e the sociocognitive sociolinguistic research composition work genre analysis and pedagogical practices developed on L1 and L2 writing can be situated and acquire meaning This volume will be of particular interest to researchers in the areas of language and literacy education in L1 and L2 applied linguists interested in school and academic contexts of writing teacher educators and graduate students working in the fields of L1 and L2 writing

Text, Context and the Johannine Community David A. Lamb, 2014-04-24 Text Context and the Johannine Community adopts a new approach to the social context of the Johannine writings by drawing on modern sociolinguistic theory Sociolinguistics emphasizes language as a social phenomenon which can be analysed with reference not only to its broad context of culture but also through the use of register analysis to its narrower context of situation The Johannine writings have increasingly been seen as the product of a distinct Johannine Community depicted by some scholars as a sectarian group opposed both to wider Jewish society and to other Christian groups This model has largely been constructed on historical critical grounds yet given our lack of reliable external information about the origin of the Johannine writings a more fruitful approach may be to examine their lexico grammatical and discourse features to determine what these imply about interpersonal relationships This study compares selected narrative asides from the Gospel of John with a passage section from 1 John and with the two shorter Johannine Epistles It concludes that register analysis of these texts does not support the idea of a close knit sectarian group

Readings in Interpretation Andrzej Warminski, 1987 Putting Assessment for Learning Into Practice in a Higher Education EFL Context Edmund Michael White, 2009 Writing the Social Text Richard Brown, 2017-07-05 During the past decade it has become commonplace to interpret social and cultural reality the very groundwork of the social sciences as linguistic constructions Not only is society viewed as a text but scientific texts themselves are seen as rhetorical constructions This collection of scholarly essays begins with an overview of this emerging field and covers the specific stylistic practices by which social scientists create objective or true representations of society The volume closes with a consideration of the more telling challenges to the rhetorics of the social sciences and how these might be encompassed or overcome
