The Politics and Governance of Basic Education Brian Levy, Robert Cameron, Ursula Hoadley, Vinothan Naidoo, 2018-09-05

This is an open access title available under the terms of a CC BY NC ND 4.0 International licence. It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations. All over the world economic inclusion has risen to the top of the development discourse. A well performing education system is central to achieving inclusive development but the challenge of improving educational outcomes has proven to be unexpectedly difficult. Access to education has increased but quality remains low with weaknesses in governance comprising an important part of the explanation. *The Politics and Governance of Basic Education* explores the balance between hierarchical and horizontal institutional arrangements for the public provision of basic education. Using the vivid example of South Africa, a country that had ambitious goals at the outset of its transition from apartheid to democracy, it explores how the interaction of politics and institutions affects educational outcomes. By examining lessons learned from how South Africa failed to achieve many of its goals, it constructs an innovative alternative strategy for making process combining practical steps to achieve incremental gains to re-orient the system towards learning.

Educational Change in South Africa, 2019-02-11 The literature on Educational Change has been dominated by research published in the established liberal democracies. This volume examines Educational Change in South Africa, a country undergoing rapid social and political change and situated geographically, historically and culturally in the South. What are the meanings and processes of change? How do we explain the contours and contexts of change? What has changed? What has remained the same?

International Handbook of Mathematical Learning Difficulties Annemarie Fritz, Vitor Geraldi Haase, Pekka Räsänen, 2019-01-30 This comprehensive volume provides teachers, researchers and education professionals with cutting edge knowledge developed in the last decades by the educational, behavioural and neurosciences, integrating cognitive, developmental and socioeconomic approaches to deal with the problems children face in learning mathematics. The neurocognitive mechanisms and the cognitive processes underlying acquisition of arithmetic abilities and their significance for education have been the subject of intense research in the last few decades but the most part of this research has been conducted in non-applied settings and there is still a deep discrepancy between the level of scientific knowledge and its implementation into actual educational settings. Now it is time to bring the results from the laboratory to the classroom. Apart from bringing the theoretical discussions to educational settings, the volume presents a wide range of methods for early detection of children with risks in mathematics learning and strategies to develop effective interventions based on innovative cognitive test instruments. It also provides insights to translate research knowledge into public policies in order to address socioeconomic issues. And it does so from an international perspective, dedicating a whole section to the cultural diversity of mathematics learning difficulties in different parts of the world. All of this makes the *International Handbook of Mathematical Learning Difficulties* an essential tool for

those involved in the daily struggle to prepare the future generations to succeed in the global knowledge society State of the Nation Sakhela Buhlungu, 2007 State of the Nation South Africa 2007 offers 22 diverse angles on contemporary South Africa in one compelling and comprehensive collection The politics section focuses on the outcome of the 2006 local government elections and issues of service delivery The economy section examines the rapidly growing social welfare net the state of our public health systems and the topics of water and the environment heritage and tourism Violence against women prison reform the plight of South Africa's former guerrilla fighters transformation in South African rugby and the post apartheid role of the church all come under the spotlight in the society section The volume concludes with a look at trends in the continuing involvement of South African business on the African continent South Africa's part in the complex search for peace and stability in the Democratic Republic of Congo and the life of the vast Zimbabwean exile community in South Africa

Research for Educational Change Jill Adler, Anna Sfard, 2016-06-17 Research for Educational Change presents ways in which educational research can fulfil its commitments to educational practice Focussing its discussion within the context of mathematics education it argues that while research generated insights can have beneficial effects on learning and teaching the question of how these effects are to be generated and sustained is far from evident The question of how to turn research into educational improvement is discussed here in the context of learning and teaching hindered by poverty and social injustice In the first part of the book four teams of researchers use different methodologies while analysing the same corpus of data collected in a South African mathematics classroom In the second part each of these teams makes a specific proposal about what can be done and how so that its research generated insights have a tangible beneficial impact on what is happening in mathematical classrooms Combining two discourses that of researchers speaking to one another and that of researchers communicating their insights to those responsible for educational practice the book deals with the perennial question of communication between those who study educational processes and those who are directly responsible for teacher education educational research and classroom practices This book will be key reading for postgraduates researchers and academics in education and particularly in the areas of mathematics education education research teacher education and classroom practice It will also appeal to teacher educators practitioners and undergraduate students interested in educational research

Monitoring Child Well-being Andrew Dawes, Rachel Bray, Amelia Van der Merwe, 2007 Taking a rights based approach this comprehensive study develops a conceptual framework and a definitive set of holistic indicators for monitoring the well being of children in South Africa Taking cues from the child rights focus of the South African constitution it is made clear that it is not just the state of the children that is important to measure but also the contexts within which the children grow and develop Providing practical tools for policy makers to assess the effectiveness of child based policies and interventions this practical work addresses a wide range of domains child poverty HIV and AIDS education mental health and disability abuse and neglect the justice system and children affected by the worst forms of labor

 to the body of scholarly knowledge in education In his evaluation of the book Acting Executive Dean Faculty of Education and
 Training Professor Akpovire Oduaran made the following remarks To a large extent the ideas put together in this book have
 come from data generated not just from literature found in books and journals but actual interactions with educators and the
 learning environment So then what the reader is offered in this volume is the articulation of ideas that have been
 interrogated structured and presented in surprisingly simplistic and yet incisive and academically enriching content that can
 match the standards of scholarship that is available in the Western World Yet what makes this book so welcome relevant and
 timely is the fact that it is built around Afrocentric theories and practices such as one may find in imported literature *Key*
Issues in Sustainable Development and Learning William Scott,Stephen Gough,2004 This book presents seminal readings
 from existing literature alongside specially commissioned critical vignettes from leading thinkers with interests in sustainable
 development and learning The book sets out to inform readers about the many perspectives that exist and to challenge
 assumptions they may have about both sustainable development and learning Through the readings and vignettes the book
 raises wide ranging issues of how we choose to act Following the format of its companion volume Sustainable Development
