Wced Past Papers 21:

Advances in Special Education Research and Praxis in Selected Countries of Africa, Caribbean and the Middle East Kagendo Mutua, Cynthia S Sunal, 2012-06-01 This edited volume explores various issues pertaining to the education of children with disabilities in Africa the Caribbean and Middle East As a group persons with disabilities have been subjected to social cultural and educational exclusions of various forms and for various socially scripted reasons In education for instance individuals with disabilities have been altogether excluded from educational participation in many parts of the developing world or they have been excluded from pursuing meaningfully beneficial higher levels of education in developed countries like the United States One of the social responses remedies to the widely acknowledged exclusionary practices experienced by learners with disabilities has been the widespread implementation of inclusive practices in the education of individuals with disabilities across countries in the west and the developing regions of the world A distinctive marker of difference in the way inclusive practices have been enacted in western countries versus those in the developing world has primarily stemmed from the fact that majority of western countries operate under funded mandates that also regulate the provision of education to persons with disabilities While the ideal of inclusion has been highly desirable many of countries in the developing world have floundered in their implementation due to lack sound legislative framework to guide implementation coupled with socio cultural factors related to negative perceptions of disabilities and limited funding sources Chapters in this volume explore inclusive education from a variety of perspectives

Integrative Approaches to Sustainable Development at University Level Walter Leal Filho, Luciana Brandli, Olga Kuznetsova, Arminda Maria Finisterra do Paço, 2014-10-09 This book documents and compares the experiences of a wide range of universities across the five continents with regard to sustainable development making it of special interest to sustainability researchers and practitioners By showcasing how integrative approaches to sustainable development at the university level can be successfully employed to bridge the gaps between disciplines the book provides a timely contribution to the literature on sustainability and offers a valuable resource for all those interested in sustainability in a higher education context

[The Routledge Handbook of Global Sustainability Education and Thinking for the 21st Century](#) Michele John, 2025-02-20 This Handbook emerges as a pivotal resource in underscoring the important role of sustainability education in catalysing a global shift toward sustainable development It articulates the need for a profound transformation within institutional leadership and educational frameworks to support the critical global sustainability transition This Handbook explores sustainability thinking as a critical paradigm shift in confronting the multifaceted challenges of sustainable development It presents an urgent case for a systemic overhaul in our approach to education in the 21st century advocating for multidisciplinary education and holistic systems thinking in order to more successfully navigate the complexities of sustainable development The text discusses the foundational elements of modern sustainability thought and management including the significance of values ethics governance and the pressing

issues of environmental degradation and climate change It offers an extensive trans disciplinary overview of sustainability discourse spanning a broad array of perspectives on sustainability management and education It provides a comprehensive introduction to the language of sustainability and a detailed examination of sustainability issues highlighting their implications for education training and management development It addresses urgent global issues such as decarbonisation resource scarcity population dynamics pollution and land degradation emphasising the crucial role of educational initiatives in helping to mitigate these challenges This seminal work has been developed for a diverse audience including academics policymakers students and educators serving as a valuable tool for those wanting to comprehend complex global sustainability challenges and the paramount importance of education in supporting global sustainability in the 21st century

Key Concepts in Public Archaeology Gabriel Moshenska,2017-09-28 This book provides a broad overview of the key concepts in public archaeology a research field that examines the relationship between archaeology and the public in both theoretical and practical terms While based on the long standing programme of undergraduate and graduate teaching in public archaeology at UCL s renowned Institute of Archaeology the book also takes into account the growth of scholarship from around the world and seeks to clarify what exactly public archaeology is by promoting an inclusive socially and politically engaged vision of the discipline Written for students and practitioners the individual chapters provide textbook level introductions to the themes theories and controversies that connect archaeology to wider society from the trade in illicit antiquities to the use of digital media in public engagement and point readers to the most relevant case studies and learning resources to aid their further study This book was produced as part of JISC s Institution as e Textbook Publisher project Find out more at <https://www.jisc.ac.uk/rd/projects/institution-as-e-textbook-publisher> Praise for Key Concepts in Archaeology Littered throughout with concise and well chosen case studies Key Concepts in Public Archaeology could become essential reading for undergraduates and is a welcome reminder of where archaeology sits in UK society today British Archaeology

Annual Report for the Year Ending ... Namibia. Ministry of Basic Education and Culture,1995 **Food for All** Uma J. Lele,Uma Lele,Manmohan Agarwal,Brian C. Baldwin,Sambuddha Goswami,2021 This book assesses the prospects for achieving the sustainable development goals and the role of international organizations in achieving them in light of recent economic medical and environmental developments **The European Union and Global Development** S. Gänzle,S.

Grimm,D. Makhan,2012-04-17 An assessment of the capacity of the EU to coordinate actors and policies with regards to global development The authors argue that the EU and its member states have the potential to act for global development when they are able to improve policy and actor coherence such as through better linking of bilateral and community programmes

Linkages Between Land Management, Land Degradation, and Poverty in Sub-Saharan Africa Nkonya, Ephraim,Pender, John,Kaizzi, Kayuki C.,Kato, Edward,Mugarura, Samuel,Ssali, Henry,Muwonge, James,2008-01-01 Most African countries strive for both poverty reduction and sustainable land management yet information on the exact

relationship between these goals is limited This report seeks to fill the gap by demonstrating a strong linkage between poverty and land management Using Uganda as a case study the authors show that certain policies such as investments in soil and water conservation and agroforestry may simultaneously increase productivity and reduce poverty and land degradation Other strategies including development of rural roads non farm activities and rural finance may reduce poverty without significantly affecting productivity or land management Some policies however will likely involve trade offs among different goals and will need to have their negative impacts minimized Those in government NGOs the private sector or academia who are concerned about sustainably reducing poverty in Sub Saharan Africa will benefit from this analysis of how to pursue these key development goals

Sustainable Macroeconomics, Climate Risks and Energy Transitions

Unurjargal Nyambuu,Willi Semmler,2023-05-30 Given the industrialized world s historical dependence on fossil fuel based energy resources and the now realized perils of moving beyond the earth s carbon budget this book explores the myriad challenges of climate change and in reaching a low carbon economy Reconciling the medium term competing yet frequently complementary needs for transition policies the book provides guidelines for complex and often conflicting climate policy tasks The book presents empirical trends in the use of carbon emitting resources and evaluates market driven short termism and its adverse impact on resource use and the environment it emphasizes a medium term macroeconomic perspective for the transition The authors attempt a paradigm shift towards a framework of sustainable macroeconomics They survey relevant historical models conduct empirical and numerical analyses of the climate change relevant dynamic models provide empirical illustrations and evaluate diverse policy options and implementations together with their historical evolution New analytical issues are also considered e g strategic behavior in the energy and resource sectors energy competition and the dynamics of market shares in new energy technology and supporting policies for dealing with the tipping points encountered in climate change The authors suggest a multitude of market based strategies and public fiscal monetary and financial policies and longer run planning for resource extraction all suitable for driving sustainable growth and a transformation of the energy sector The book also examines the multiple delaying forces slowing the transition to a low carbon economy these typically arise from short termism lock ins irreversibility leakages non cooperative games and other political strategies Thus they explain the snail s pace evolution of current national and global climate policies The book will appeal to scholars and students of economics and environmental science It is also relevant for policymakers and practitioners in multilateral institutions research institutions as well as governments and ministries of countries interested in alternative energy sources climate economists and those who study the implementation of sustainable and low carbon based policies

Water for Life
James L. Wescoat, Jr,Gilbert F. White,2003-10-16 Successful water management is crucial for the proper operation of natural environmental systems and for the support of human society These two aspects are interdependent but decisions about one are often made without regard to effects upon the other A persistent challenge is to consider them together This book fully

analyzes the relationship between water management environmental conditions and public policy It combines a careful review of the character and evolution of water management and evaluates management from the standpoint of the quality of the natural environment Topics covered include domestic and industrial water supply and waste disposal groundwater use river channel and floodplain management and integrated river basins The processes of social decision making are examined against a backdrop of plant soil water ecosystem relationships and ecosystem change Examples are drawn from around the world from local watershed management to international river basin planning with emphasis on integrative approaches

Prioritizing the Environment in Urban Sustainability Planning Natasha Tang Kai,Larry Swatuk,2023-12-01 This book examines the extent to which the environment is addressed in the sustainability plans of Canadian cities It assesses if and to what extent select leading environmental priorities are addressed in the sustainability plans of sixteen Canadian cities followed by analysis of efforts towards each priority It scores and ranks cities against each environmental priority and highlights what makes some cities lead and others lag in environmental sustainability The book unravels the complexity similarities and differences in environmental sustainability planning across major cities in Canada The project reflects what s working who s leading and which environmental priorities support the sustainable city model Climate change has exacerbated the impacts of flood droughts wildfire and storms urban centers must account for sustainability to mitigate and adapt to a changing and uncertain landscape It begins with robust and integrative sustainability plans that prioritize the environment This book will make a timely contribution to the on going debate regarding the ways and means to become a sustainable city It reflects the on going sustainable development discourse and deliberations to meet the Sustainable Development Goals It cut across many SDGs in particular SDG 11 Sustainable Cities and Communities What makes this study unique is its special attention to environmental priorities within urban sustainability planning This subject is topical and would appeal to both scholars and practitioners at local regional national and global scales **Food in America** Andrew F. Smith,2017-02-16 This three volume work examines all facets of the modern U S food system including the nation s most important food and agriculture laws the political forces that shape modern food policy and the food production trends that are directly impacting the lives of every American family Americans are constantly besieged by conflicting messages about food the environment and health and nutrition Are foods with genetically modified ingredients safe Should we choose locally grown food Is organic food better than conventional food Are concentrated animal feed operations destroying the environment Should food corporations target young children with their advertising and promotional campaigns This comprehensive three volume set addresses all of these questions and many more probing the problems created by the industrial food system examining conflicting opinions on these complex food controversies and highlighting the importance of food in our lives and the decisions we make each time we eat The coverage of each of the many controversial food issues in the set offers perspectives from different sides to encourage readers to examine various viewpoints and make up their own

minds The first volume Food and the Environment addresses timely issues such as climate change food waste pesticides and sustainable foods Volume two entitled Food and Health and Nutrition addresses subjects like antibiotics food labeling and the effects of salt and sugar on our health The third volume Food and the Economy tackles topics such as food advertising and marketing food corporations genetically modified foods globalization and megagrocery chains Each volume contains several dozen primary documents that include firsthand accounts written by promoters and advertisers journalists politicians and government officials and supporters and critics of various views related to food and beverages representing speeches advertisements articles books portions of major laws and government documents to name a few These documents provide readers additional resources from which to form informed opinions on food issues

Managing Water Resources, Past and Present Julie Trottier, Paul Slack, 2004-11-25 A multi disciplinary analysis of the evolution of water politics and policy by an international team of distinguished experts Water management in the Middle Ages in Europe its evolution in the USA the elaboration of the European Water Framework Directive the British experience of water management the over exploitation of African aquifers and the evolution of the water situation in Southern Africa are all examined This volume underlines the fact that only an integrative and interdisciplinary understanding can lead to genuinely improved water management practices that will not benefit some social groups at the expense of others

Environmental Project Management Ebenezer A. Sholarin, Joseph L. Awange, 2016-04-22 This book offers a new framework that facilitates the development of more intelligent systems and methods for data analysis and international information sharing such as the use of satellite imaging and geospatial data to predict changes in weather conditions and shifts in water levels and to assess the extent of the forest cover remaining on Earth that is visible from space It brings together the many aspects of science and technology as well as formula and analytical approaches required for more informed decision making It also highlights the vital importance of understanding the technological economic and social dimensions of environmental projects that have short term results and long term impacts It is unique in that it clearly distinguishes between environmental project management EnvPM and green project management GreenPM and presents an amalgamation of environmental management and project management concepts using geospatial methods to form an EnvPM concept The book sets a benchmark for the professionalism with which environmental projects should be planned executed monitored assessed and delivered While primarily intended for professionals responsible for the management of environmental projects or interested in improving the overall efficiency of such projects it is also a useful handbook for managers in the private public and non for profit sectors It is a valuable resource for students at both undergraduate and master s levels and an indispensable guide for anyone wanting to develop their skills in modern project management environmental management and geospatial techniques We are the first generation to feel the impact of climate change and the last generation that can do something about it US President Obama s address to the United Nations on Climate Change and Global warming 2015 hison This book provides an in depth well researched and

science based approach to applying key project management and spatial tools and practices in environmental projects An important read for leaders considering projects that balance social economic growth against minimising its ill effects on Planet Earth Todd Hutchison Global Chairman of Peopleistic group The Ecological Modernisation Reader Arthur P.J. Mol, David A. Sonnenfeld, Gert Spaargaren, 2020-11-25 Structural environmental reform by firms and industries governmental and intergovernmental agencies non governmental organisations NGOs and others is a worldwide phenomenon and the focus of this definitive collection Includes a comprehensive introduction to and overview of Ecological Modernisation Theory original state of the art review essays by distinguished international scholars a selection of the best published works and debates from a quarter century of related social science scholarship an emphasis on environmental issues in Asian and other emerging economies and an agenda for continued scholarship policymaking and practice Accessible to students policymakers professionals executives and others interested in deeply understanding contemporary environmental issues and taking effective action for environmental solutions Rigorous and sophisticated for use in graduate and advanced studies Appropriate for courses in Sociology Political Science Policy Studies Geography Environmental Studies Environmental Planning Business Economics Asian Studies Development Studies and other fields **Life Cycle Assessment of Energy Systems** Nicholas Sakellariou, 2018-05-04 This groundbreaking work is the most in depth and state of the art study on the Life Cycle Assessment LCA of energy systems the only volume available on this critical subject Energy and sustainability are two of the most important and often most misunderstood subjects in our world today As these two subjects have grown in importance over the last few decades interest in the Life Cycle Assessment LCA model has grown as well as a potentially crucial tool in understanding and striving towards sustainability in energy systems Not just wind and solar systems but all energy systems need to be understood through this model Wind and solar power have the potential to decentralize the U S energy system by offering local communities electricity and economic support depending on the scale and design of projects Nevertheless every energy technology potentially faces environmental costs lay and expert opposition and risks to public health Engineers play a central role as designers builders and operators in energy systems As they extend their expertise into electrical mechanical and chemical fields from fossil fuel based systems to renewable energy systems sustainability is steadily becoming one of the key criteria engineers apply in their work This groundbreaking new study argues that engineering cultures foster sustainability by adopting assumptions and problem solving practices as part of their identities when designing and building engineering projects This work examines the politics of creating utilizing and modifying Life Cycle Assessment LCA in the construction of renewable energy systems The only volume of its kind ever written it is a must have for any engineer scientist manager or other professional working in or interested in Life Cycle Assessment and its relation to energy systems and impact on environmental and economic sustainability Environmental Challenges in South-East Asia Victor T. King, 2013-01-11 This volume discusses environmental change natural resource exploitation and the prospect for

ecological sustainability in Southeast Asia The contributors including sociologists geographers anthropologists economists political economists and historians presents the findings of recent archival and field research mainly from ongoing programmes of team research based in European universities and institutes Among the themes discussed are European and indigenous perceptions of the environment historical processes of environmental change the politics of resource use ecotourism and development deforestation and smallholding land use strategies migration and environmental degradation disease environment and human geography demography sustainability and resource exploitation **Intellectual Capital Strategy Management for Knowledge-Based Organizations** Ordóñez de Pablos, Patricia,Tennyson, Robert D.,Zhao, Jingyuan,2013-03-31 With the proper management knowledge based resources human capital relational capital structural capital aim to contribute to the creation of a competitive advantage not only for companies and institutions but also for nations and economic regions Intellectual Capital Strategy Management for Knowledge Based Organizations brings together new perspectives on the knowledge based view of strategy management as it considers the role of companies organizations and nations in the storage and measurement of their knowledge This book is useful for industry leaders practitioners academics and scholars interested in emerging aspects of knowledge management and industry services Making Climate Change History Joshua P. Howe,2017-04-03 This collection pulls together key documents from the scientific and political history of climate change including congressional testimony scientific papers newspaper editorials court cases and international declarations Far more than just a compendium of source materials the book uses these documents as a way to think about history while at the same time using history as a way to approach the politics of climate change from a new perspective Making Climate Change History provides the necessary background to give readers the opportunity to pose critical questions and create plausible answers to help them understand climate change in its historical context it also illustrates the relevance of history to building effective strategies for dealing with the climatic challenges of the future
