### **Vanguard News Newspaper:**

Nigeria's Niger Delta Sabella Ogbobode Abidde, 2017-01-31 The problems and challenges of the Niger Delta predate Nigeria as a Republic The resultant violence can be traced to 1966 when the late Isaac Boro and his colleagues attempted to secede from Nigeria due in large part to the underdevelopment of the region Historical reality aside since 1970 oil has displaced agriculture as Nigeria's primary revenue earner and it has for the last four decades been the nation's breadbasket But in spite of this the Niger Delta remains vastly underdeveloped and has been given the least federal presence These deficiencies led to high unemployment social dislocations youth restiveness and extralegalities It was these realities that bred disaffection with the government and the multinational oil companies and eventually to violent militancy Between 2003 and 2009 it also led to low intensity conflict between militant youths and the Nigerian government In the summer of 2009 however the Nigerian government extended an offer of presidential pardon amnesty to the militants The amnesty program was intended to bring peace and quiet to the region However this has not been the case In spite of the financial and political resources that have been expended the region continues on the path of volatility This book looks at the issue of nationhood the cause and cost of the crisis past approaches and current efforts at solving the crisis In addition it offers a tenable solution to the decades old crisis Furthermore the case is made that unless there is a fundamental restructuring of the Nigerian state and its governing structure and institutions the problems of the region and the larger problems that makes the country such a difficult to place to live in and govern is likely to continue

The Communication of Hate Michael Waltman, John Haas, 2011 The book was awarded the 2011 NCA Franklyn S Haiman Award for Distinguished Scholarship in Freedom of Expression This book sets out to explore how hate comes alive in language and actions by examining the nature and persuasive functions of hate in American society Hate speech may be used for many purposes and have different intended consequences It may be directed to intimidate an out group or to influence the behavior of in group members But how does this language function What does it accomplish The answers to these questions are addressed by an examination of the communicative messages produced by those with hateful minds Beginning with an examination of the organized hate movement the book provides a critique of racist discourse used to recruit and socialize new members construct enemies promote valued identities and encourage ethnoviolence The book also examines the strategic manipulation of hatred in our everyday lives by politicians political operatives and media personalities Providing a comprehensive overview of hate speech the book ends by describing the desirable features of an anti hate discourse that promotes respect for social differences

Tackling Poverty Ebikinei Stanley Eguruze,2016-04-30 This study investigates what young people and community organisations see as their support needs in Bayelsa State of Nigeria in tackling poverty It also examines the process of influencing policy makers using social marketing techniques It seeks to

expand understanding of the poverty elimination processes not only within a developing country's rural environmental context but also endeavours to generalize the findings more broadly. It seeks an inclusive approach to policy determination driven by involving grassroots levels. A mixed methods research design was adopted, engaging a quantitative approach in which 300 young people were surveyed using self-completion questionnaires. In addition, a qualitative study in which policy makers as well as young people and community organisations were interviewed. A discussion group methodology was adopted. Following the data analysis, a strategy conference was organized in Nigeria in which the major findings were presented and debated. This research has improved on the previous Multi-dimensional Poverty Index by enlarging it and combining it with a current Social Marketing Technique model. The new Multi-dimensional Poverty Index Implementable Joint Programme of Action model is user-friendly and retains the multidimensional paradigm. This extension was achieved through the literature research, the development of methodology adopting mixed methods approach and the strategy conference. The main findings of the research show that young people and community organisations support needs in Bayelsa State of Nigeria are far from being met. A great deal of additional support is required. The most significant causes of poverty amongst young people and community organisations are corruption of government officials, absence of jobs, low wages, oil pollution and IMF World Bank conditionalities. It was also found that the main experiences of poverty include a high youth unemployment rate, lack of money to go to school, lack of money to start small businesses, less food to eat, no money to treat sickness, no money to buy clothes, no money to afford decent homes, prostitution and absence of a public transportation system. The research considers the ways in which this additional support might be provided. Importantly, the research also revealed how extreme poverty could be alleviated and by persuading policy makers to create real jobs and job opportunities as well as developing employability skills and improving agriculture. In addition, there is a need to attract investors, oil companies to Bayelsa State and to increase investment spending. The lack of social infrastructure and access to free education, steady electricity and free healthcare are also seen as problems. Finally, the research revealed that actively involving young people and community organisations in policy decision making and policy implementation processes including setting new priorities or re-directing is likely to enhance the probability of ending extreme poverty.
