

## Types of Variation

### Direct Variation

$y$  varies directly as  $x$ .

As  $x$  increases,  $y$  also increases.

As  $x$  decreases,  $y$  also decreases.

Equation:  $y = kx$

### Inverse Variation

$y$  varies inversely as  $x$ .

As  $x$  increases,  $y$  decreases.

As  $x$  decreases,  $y$  increases.

Equation:  $xy = k$  or  $y = \frac{k}{x}$

### Joint Variation

$y$  varies directly to two or more quantities.

Equation:  $y = kxz$

### Combined Variation

$y$  varies directly to some quantities and varies inversely to some other quantities.

Equation:  $xy = kz$  or  $y = \frac{kz}{x}$

**Dynamics of Mathematical Models in Biology** Alessandra Rogato, Valeria Zazzu, Mario Guarracino, 2016-11-03 This volume focuses on contributions from both the mathematics and life science community surrounding the concepts of time and dynamicity of nature two significant elements which are often overlooked in modeling process to avoid exponential computations The book is divided into three distinct parts dynamics of genomes and genetic variation dynamics of motifs and dynamics of biological networks Chapters included in dynamics of genomes and genetic variation analyze the molecular mechanisms and evolutionary processes that shape the structure and function of genomes and those that govern genome dynamics The dynamics of motifs portion of the volume provides an overview of current methods for motif searching in DNA RNA and proteins a key process to discover emergent properties of cells tissues and organisms The part devoted to the dynamics of biological networks covers networks aptly discusses networks in complex biological functions and activities that interpret processes in cells Moreover chapters in this section examine several mathematical models and algorithms available for integration analysis and characterization Once life scientists began to produce experimental data at an unprecedented pace it became clear that mathematical models were necessary to interpret

data to structure information with the aim to unveil biological mechanisms discover results and make predictions The second annual Bringing Maths to Life workshop held in Naples Italy October 2015 enabled a bi directional flow of ideas from and international group of mathematicians and biologists The venue allowed mathematicians to introduce novel algorithms methods and software that may be useful to model aspects of life science and life scientists posed new challenges for mathematicians

**When Critical Multiculturalism Meets Mathematics** Patricia L. Marshall,Jessica T. DeCuir-Gunby,Allison W. McCulloch,2015-12-14 When Critical Multiculturalism Meets Mathematics details the development and outcomes of a teacher professional development project that merged multiculturalism and mathematics In six compact chapters the authors describe the impetus for their multi year project and present rich case studies of nine teacher participants The cases stand alone as compelling reading yet Marshall et al extend beyond their distinctiveness to explain the statistical data related to the project s broader impact Emphasizing both qualitative and quantitative findings makes this book ideal for novice researchers interested in mixed method study Likewise the authors unveil the anatomy and a few complexities of conducting research in the real world contexts of schools including participant recruitment and resolution of unanticipated matters that can arise within research teams A unique twist in the final chapter is Marshall et al s critique of their own missteps as researchers which are used skillfully and unobtrusively to proffer tips for future studies They conclude by theorizing affirmed intersectionality identified as the critical element that facilitated teachers recognition and acceptance of the compatibility between the study s two components
