You can surely do it; just read this book and apply some of the training techniques. Good luck.

This book presents a new and innovative concept in dealing with dogs: the human-canine synergy (HCS), characterized by a holistic nature and its differentiation from unidimensional terms expressing the affiliation of humans and dogs. Relationship, Interaction, Bonding. Related to the use and training by humans, it applies three main categories of dogs: a) the empathy/therapeutic individuals which are dogs helping persons with empathy or therapeutic needs; b) assisting working dogs carrying out specific actions to aid or assist humans perform specific tasks; and c) the facilitating/inspiring dogs which enable or improve various human activities including classroom dogs for teaching and learning purposes in almost all educational subjects. Organized in three parts, chapters address the following needs. The first section illuminates the concept of HCS as well as basic principles determining this synergy and consequently the process of training dogs, owners, and professional trainers. Readers will understand the role of a dog's personality, behavior, and especially temperament in its successful training. In a scientifically documented way, the second part guides those who wish to engage in dog training, amateur or professional. It describes basic training forms within the HCS framework: obedience, protection, detection, and classroom dog, and necessary steps for proper completion. The third book part describes the business of dog training with a multi-dimensional approach by emphasizing a good understanding and knowledge of interactions and the environment in which trainer, owner, and dog typically operate.
