Carbon Management National Research Council,Division on Earth and Life Studies,Board on Chemical Sciences and Technology,Chemical Sciences Roundtable,2001-09-15 Considerable international concerns exist about global climate change and its relationship to the growing use of fossil fuels Carbon dioxide is released by chemical reactions that are employed to extract energy from fuels and any regulatory policy limiting the amount of CO₂ that could be released from sequestered sources or from energy generating reactions will require substantial involvement of the chemical sciences and technology R D community Much of the public debate has been focused on the question of whether global climate change is occurring and if so whether it is anthropogenic but these questions were outside the scope of the workshop which instead focused on the question of how to respond to a possible national policy of carbon management Previous discussion of the latter topic has focused on technological economic and ecological aspects and on earth science challenges but the fundamental science has received little attention This workshop was designed to gather information that could inform the Chemical Sciences Roundtable in its discussions of possible roles that the chemical sciences community might play in identifying and addressing underlying chemical questions

Biological Essentialism Michael Devitt,2023-01-31

Biological Essentialism addresses three main issues. The first concerns the essences natures identities of biological taxa particularly species Kripke and other metaphysicians hold that these essences are at least partly intrinsic underlying probably largely genetic properties. This view based largely on intuitions is dismissed by the consensus in the philosophy of biology as being incompatible with Darwinism and reflecting ignorance of biology. Biological Essentialism argues that the demands of biological explanation show that the metaphysicians are right. The positive view of the consensus is that the essences are wholly relational taxa must have certain histories. Biological Essentialism argues that there is indeed an historical component to the essence but this component presupposes an intrinsic component. Its second issue concerns the essences of biological individuals. Metaphysicians have had much to say about this again on the basis of intuitions. Many hold that an individual is essentially a member of its species. This has recently been unequivocally rejected by philosophers of biology. Biological Essentialism appeals to biological explanation again to argue for essential membership furthermore to argue for the Kripkean view that an organism's essence is partly intrinsic and partly relational a matter of origin. Finally the book addresses the lively contemporary issue of whether race is biologically real. From the perspective developed earlier the book argues that there are indeed racial kinds in some sense that are in the realm of the biological. These kinds also have partly historical and partly intrinsic underlying essences.

On a Global Mission: The Automobiles of General Motors

International Volume 3 Louis F. Fourie, 2016-12-27. Volume One traces the history of Opel and Vauxhall separately from inception through to the 1970s and thereafter collectively to 2015. Special attention is devoted to examining innovative engineering features and the role Opel has taken of providing global platforms for GM. Each model is examined individually and supplemented by exhaustive supporting specification tables. The fascinating history of Saab and Lotus begins with their humble beginnings and examines each model in detail and looks at why these unusual marques came under the GM Banner. Included is a penetrating review of Saab through to its unfortunate demise. Volume Two examines unique models and variations of Chevrolet and Buick manufactured in the Southern Hemisphere and Asia but never offered in North America. Daewoo, Wuling and Baojun are other Asian brands covered in detail. This volume concludes with recording the remarkable early success of Holden and its continued independence through to today. Volume Three covers the smaller assembly operations around the world and the evolution of GM's export operations. A brief history of Isuzu, Subaru and Suzuki looks at the three minority interests GM held in Asia. The GM North American model specifications are the most comprehensive to be found in a single book. Global and regional sales statistics are included. GM executives and management from around the globe are listed with the roles they held. An index ensures that these volumes serve as the ideal reference source on GM.

Language and Reality from a Naturalistic Perspective Andrea Bianchi, 2020-10-19. This book celebrates the many important contributions to philosophy by one of the leading philosophers in the analytic field Michael Devitt. It collects seventeen original essays by renowned philosophers from all over the world. They all develop themes from Devitt's work thus

discussing many fundamental issues in philosophy of linguistics theory of reference theory of meaning methodology and metaphysics In a long final chapter Devitt himself replies to the contributors In so doing he further elaborates his views on various of these issues for example defending his claim in opposition to Chomskyan orthodoxy that languages are external rather than internal his well known causal theory of reference his shocking idea that meanings can be causal non descriptive modes of presentation his methodological naturalism his commitment to scientific realism and his version of biological essentialism The volume will appeal to all scholars and students interested in contemporary theoretical analytic philosophy and will be a must read for any serious researcher in philosophy of language It provides a deep insight into the work of one of the most important living philosophers and will help readers to better understand language and reality from a naturalistic perspective **Design & Applied Arts Index** ,2001 [Focus On: 100 Most Popular Station Wagons](#) Wikipedia
