Roadmap for Global Sustainability — Rise of the Green Communities Salah El-Haggar, Aliaa Samaha, 2019-05-08 Progressive increases in consumer demands along with aggressive industrial consumption led the world to proximate resource depletion weather changes soil and air degradation and water quality deterioration We now know that the paradigm of production at the expense of human condition is not sustainable This book briefly explains how we reached this situation and offers suggestions as to what can be done to overcome it It invites the best entrepreneurial talent and scientific and technological know how to develop a sustainable economy around sustainable communities services and sectors A major obstacle previously identified by involved parties was the ability of accommodating for the emerging economic growth without causing harm to the environment especially with resource depletion This book provides the solution by creating a need to bring on a new revolution that preserves the rights of next generations to live in a healthy environment This Sustainability Revolution requires the integration of economic environmental and social factor as well as the practical aspects of implementing sustainability through green activities which are discussed throughout the book In this book a globalization is proposed that encourages creativity and innovation towards sustainability With this global sustainability approach real globalization both rich and poor will benefit from the global sustainability approach This will close the gap between rich and poor Developing countries could reap the benefit of current technology without undergoing many of the growing pains associated with development of these technologies Governments are able to better work together towards common goals now that there is an advantage in cooperation an improved ability to interact and coordinate and a global awareness of issues The book presents a sustainability roadmap to bring together various concepts that have been dealt with independently by previous authors and link them to establish the fundamental practical steps The flow path and

the direction for successful implementation of a sustainability roadmap are also discussed in detail in the book For the first time the authors use sustainable communities to create a better quality of life for residents while minimizing the use of the resources to meet current needs and ensure adequate resources for future generations These green communities create new industries for the local economy and improve public health which offers more hope for their citizens Sustainable transportation renewable energy recycling clean water and urban forests help to make a more livable community and help to control the global climate change They involve all citizens and incorporate local values into decision making Schools That Heal Claire Latane, 2021-06-03 Research shows that access to nature big classroom windows and open campuses along active streets reduce stress anxiety disorderly conduct and crime Yet too many American public schools look and feel like prisons They are designed out of fear of vandalism truancy and added maintenance costs Despite decades of research demonstrating the benefits of restorative school environments for students mental physical and academic success they aren't yet part of mainstream conversations about mental health and wellbeing or school planning design maintenance and safety Restorative school environments can invite and build a broad community around our children and adolescents improve the quality of the neighborhood reduce students anxiety and aggression and make them feel safer more hopeful and whole Schools That Heal explains the compelling connections between human health and school design and look at how investing in school design elements large and small that promote health can positively impact both students and the entire community promoting resilience and environmental justice *The Design of Learning Experience* Brad Hokanson, Gregory Clinton, Monica W. Tracey, 2015-07-03 This book delves into two divergent yet parallel themes first is an examination of how educators can design the experiences of learning with a focus on the learner and the end results of education and second how educators learn to design educational products processes and experiences The book seeks to understand how to design how learning occurs both in the instructional design studio and as learning occurs throughout the world This will change the area's semantics at a deeper level it will change its orientation from instructors and information to learners and it will change how educators take advantage of new and old technologies This book is the result of a research symposium sponsored by the Association for Educational Communications and Technology AECT *Environmental Health* Howard Frumkin, 2016-02-09 The bestselling environmental health text with all new coverage of key topics *Environmental Health From Global to Local* is a comprehensive introduction to the subject and a contemporary authoritative text for students of public health environmental health preventive medicine community health and environmental studies Edited by the former director of the CDC's National Center for Environmental Health and current dean of the School of Public Health at the University of Washington this book provides a multi-faceted view of the topic and how it affects different regions populations and professions In addition to traditional environmental health topics air water chemical toxins radiation pest control it offers remarkably broad cross-cutting coverage including such topics as building design urban and regional planning energy transportation disaster

preparedness and response climate change and environmental psychology This new third edition maintains its strong grounding in evidence and has been revised for greater readability with new coverage of ecology sustainability and vulnerable populations with integrated coverage of policy issues and with a more global focus Environmental health is a critically important topic and it reaches into fields as diverse as communications technology regulatory policy medicine and law This book is a well rounded guide that addresses the field s most pressing concerns with a practical bent that takes the material beyond theory Explore the cross discipline manifestations of environmental health Understand the global ramifications of population and climate change Learn how environmental issues affect health and well being closer to home Discover how different fields incorporate environmental health perspectives The first law of ecology reminds is that everything is connected to everything else Each piece of the system affects the whole and the whole must sustain us all for the long term Environmental Health lays out the facts makes the connections and demonstrates the importance of these crucial issues to human health and well being both on a global scale and in our homes workplaces and neighborhoods

Building Energy Audits-Diagnosis and Retrofitting Constantinos A. Balaras,2021-01-12 The book Building Energy Audits Diagnosis and Retrofitting is a collection of twelve papers that focus on the built environment in order to systematically collect and analyze relevant data for the energy use profile of buildings and extended for the sustainability assessment of the built environment The contributions address historic buildings baselines for non residential buildings from energy performance audits and from in situ measurements monitoring and analysis of data and verification of energy saving and model calibration for various building types The works report on how to diagnose existing problems and identify priorities assess and quantify the opportunities and measures that improve the overall building performance and the environmental quality and well being of occupants in non residential buildings and houses Several case studies and lessons learned from the field are presented to help the readers identify quantify and prioritize effective energy conservation and efficiency measures Finally a new urban sustainability audit and rating method of the built environment addresses the complexities of the various issues involved providing practical tools that can be adapted to match local priorities in order to diagnose and evaluate the current state and future scenarios towards meeting specific sustainable development goals and local priorities From Collective Beings to Quasi-Systems Gianfranco Minati,Eliano Pessa,2018-01-29 This book outlines a possible future theoretical perspective for systemics its conceptual morphology and landscape while the Good Old Fashioned Systemics GOFS era is still under way The change from GOFS to future systemics can be represented as shown in the book title by the conceptual change from Collective Beings to Quasi systems With the current advancements problems and approaches occurring in contemporary science systemics are moving beyond the traditional frameworks used in the past From Collective Beings to Coherent Quasi Systems outlines a conceptual morphology and landscape for a new theoretical perspective for systemics introducing the concept of Quasi systems Advances in domains such as theoretical physics philosophy of science

cell biology neuroscience experimental economics network science and many others offer new concepts and technical tools to support the creation of a fully transdisciplinary General Theory of Change This circumstance requires a deep reformulation of systemics without forgetting the achievements of established conventions The book is divided into two parts Part I examines classic systemic issues from new theoretical perspectives and approaches A new general unified framework is introduced to help deal with topics such as dynamic structural coherence and Quasi systems This new theoretical framework is compared and contrasted with the traditional approaches Part II focuses on the process of translation into social culture of the theoretical principles models and approaches introduced in Part I This translation is urgent in post industrial societies where emergent processes and problems are still dealt with by using the classical or non systemic knowledge of the industrial phase
