borders for the multilateral institutions and aid agencies and for the non governmental organisations that focus on their conservation Grounded in the perspective of political ecology contributors to this volume approach forests as socially alive spaces produced by a confluence of local histories and global circulations In doing so they collectively explore the multiple ways in which these forests come into view and therefore into being Exploring the local dynamics within and around these forests provides an insight into regional issues that have global resonance Intertwined as they are with cosmological beliefs and livelihoods as sites of biodiversity and Western desire these forests have been and are still being transformed by the interaction of foreign and local entities Focusing on case studies from Papua New Guinea the Solomon Islands and the Gambier Islands this volume brings new perspectives on how Pacific Islanders continue to creatively engage with the various processes at play in and around their forests
