Language Teaching and Learning Debbita Tan Ai Lin, Christine Liew Ching Ling, Ambigapathy Pandian, 2014-06-19 In every discussion on the role that language plays in our lives every orator from prominent politicians and corporate figures to linguists educational experts and others concedes that language is important in all spheres of life Language is both personal and introspective as well as public and communal Without it we would not be able to communicate and articulate our thoughts and feelings to ourselves to those in our inner circles and to those in the world at large Without it we would not be able to establish partnerships and collaborations and to unite peoples of diverse backgrounds and intrinsic values Without it too we would not be able to learn new discoveries and gain new knowledge The nurturing of a language learning culture is of the utmost importance to ensure that language teaching and learning supports the development of individuals societies nations and populations Language researchers educators and practitioners need to ensure that their learners are empowered to remain relevant They need to produce critical and analytical thinkers and successful language users in listening speaking reading and writing The collection of chapters in this volume addresses language teaching and learning dilemmas and draws attention to the challenges researchers have overcome and those they continue to face The book chapters here reflect the transcendence by language teaching and learning of ordinary boundaries especially with the advent of the digital revolution and provide new perspectives pedagogies and approaches that help shape ethical responsible and sustainable policies Readers of this volume

performance intake and by doing so to arrive at a more complete picture of the learning process The book presents the results of a study on the effects of 1 implicit and explicit inductive instructions and 2 three task types on both intake and acquisition of two English grammatical structures The study used various measures to determine intake as well as the development of both implicit and explicit knowledge The results of the study support the claims made for the benefits of Focus on Form but do not support the claims made for the benefits of more explicit types of instruction Further the results show that there is no direct relationship between intake and acquisition and that different task types can have a differential effect on immediate task performance on the one hand and learning on the other The book discusses these findings in the light of previous research and considers their implications both at the theoretical level and for language teaching practice

Acquisition of Romance Languages Pedro Guijarro-Fuentes, Maria Juan-Garau, Pilar Larrañaga, 2016-09-12 This volume presents a collection of new articles that investigate the acquisition of Romance languages across different acquisition contexts as well as refine and propose new theoretical constructs such as complexity of linguistic features as a relevant factor forming children s adults and bilinguals acquisition of syntactical morphological and phonological structures
