Its purpose is to provide the context for employing and integrating Army Aviation into unified land operations. It describes how Army Aviation forces as part of the combined arms team shape operational environments. OEs prevent conflict, conduct large scale combat operations, LSCO, and consolidate gains against a peer threat. FM 3-04 provides a foundation for subordinate training, doctrine, professional military education, leader development, and individual and collective training. Together with ADP 3-0, ADP 3-90, and FM 3-0, this manual provides the foundation for how Army Aviation forces conduct prompt and sustained LSCO. FM 3-04 is applicable to all members of the Army Profession: leaders, Soldiers, and Army civilians. The principle audience for FM 3-04 is commanders, staffs, and leaders at all echelons of the combined arms team. **Fundamentals of Flight** U. S. Army,2010-07-01 This is the current official army U S Army Field Manual, unchanged since this edition completed 7th May 2007. *Field manual FM 3-04 203* presents information to plan and conduct common aviation tasks for fixed and rotary wing flight. However, it has become more inclusive, and its scope broadened to reduce the number of manuals used by Army crewmembers for reference. One of the underlying premises of Army aviation is if crewmembers understand why they will be better prepared to do when confronted with the unexpected. FM 3-04 203 endeavors to ensure that crewmembers understand the basic physics of flight and the dynamics associated with fixed and rotary wing aircraft. A comprehensive understanding of these principles will better prepare a crew member for flight transition training and tactical flight operations.
