Capozzoli, Lakhmi C. Jain, 2019-10-26 This volume contains the proceedings of the 11th KES International Conference on Sustainability and Energy in Buildings 2019 SEB19 held in Budapest 4th 5th July 2019 organised by KES International in partnership with Cardiff Metropolitan University Wales UK SEB 19 invited contributions on a range of topics related to sustainable buildings and explored innovative themes regarding sustainable energy systems The aim of the conference was to bring together researchers and government and industry professionals to discuss the future of energy in buildings neighbourhoods and cities from a theoretical practical implementation and simulation perspective The conference formed an exciting chance to present interact and learn about the latest research and practical developments on the subject The conference attracted submissions from around the world Submissions for the Full Paper Track were subjected to a blind peer review process Only the best of these were selected for presentation at the conference and publication in these proceedings It is intended that this volume provides a useful and informative snapshot of recent research developments in the important and vibrant area of Sustainability in Energy and Buildings Emergency Power Backup Jack Patterson, AI, 2025-02-21

Emergency Power Backup addresses the critical need for reliable power solutions in an era increasingly vulnerable to grid instability and power outages It explores alternative energy sources and the engineering principles behind effective backup systems highlighting the shift from backup power as a luxury to a necessity The book demonstrates evaluating energy needs and selecting suitable alternate sources such as solar photovoltaic wind and battery storage which are crucial for ensuring power resilience across diverse applications It emphasizes a proactive approach to designing robust backup systems essential for industries like healthcare telecommunications and residential complexes where power failures can have catastrophic consequences This book bridges the gap between theory and practical application by presenting methodologies for evaluating designing and deploying emergency power systems It builds upon fundamental electrical engineering principles including circuit analysis and power systems design while also introducing key concepts in renewable energy The book progresses from an overview of emergency power's importance to detailed sections on prime movers energy storage and backup system design using real world case studies to illustrate practical applications in various settings It also examines grid interactive systems and microgrids showcasing their role in enhancing power resilience and efficiency

Sustainable Federal Facilities Federal Facilities Council, The Federal Facilities Council Ad Hoc Task Group on Integrating Sustainable Design, Life-Cycle Costing, and Value Engineering into Facilities Acquisition, 2001-04-30 In the late 1990s several of the sponsor agencies of the Federal Facilities Council began developing and implementing initiatives and policies related to sustainable development Guidance related to life cycle costing and value engineering was recognized as being supportive of sustainable development in particular when used in the conceptual planning and design phases of acquisition where decisions are made that substantially effect the ultimate performance of a building over its life cycle However specific concerns were raised that when federal agencies apply value engineering in the final stages of design or during construction

in response to cost overruns design features that support sustainable development may be eliminated The primary objective of this study therefore was to develop a framework to show how federal agencies can use value engineering and life cycle costing to support sustainable development for federal facilities and meet the objectives of Executive Order 13123
