Li, 2012-01-03 In this book the design of two new planar patterns for camera calibration of intrinsic parameters is addressed and a line based method for distortion correction is suggested The dynamic calibration of structured light systems which consist of a camera and a projector is also treated Also the 3D Euclidean reconstruction by using the image to world transformation is investigated Lastly linear calibration algorithms for the catadioptric camera are considered and the homographic matrix and fundamental matrix are extensively studied In these methods analytic solutions are provided for the computational efficiency and redundancy in the data can be easily incorporated to improve reliability of the estimations This volume will therefore prove valuable and practical tool for researchers and practitioners working in image processing and computer vision and related subjects

Computer Vision Systems Henrik I. Christensen, 1998-12-18 Computer Vision has

now reached a level of maturity that allows us not only to perform research on individual methods but also to build fully integrated computer vision systems of a significant complexity. This opens up a number of new problems related to architectures, systems integration, validation of systems using benchmarking techniques and so on. So far the majority of vision conferences have focused on component technologies which has motivated the organization of the First International Conference on Computer Vision Systems (ICVS). It is our hope that the conference will allow us not only to see a number of interesting new vision techniques and systems but hopefully also to define the research issues that need to be addressed to pave the way for more wide scale use of computer vision in a diverse set of real world applications. ICVS is organized as a single track conference consisting of high quality previously unpublished contributed papers on new and original research on computer vision systems. All contributions will be presented orally. A total of 65 papers were submitted for consideration by the conference. All papers were viewed by three reviewers from the program committee. Thirty two of the papers were selected for presentation. ICVS 99 is being held at the Alfredo Kraus Auditorium and Convention Centre in Las Palmas on the lovely Canary Islands, Spain. The setting is spri like which seems only appropriate as the basis for a new conference.
