Abstract:—An experimental investigation of the effects of the addition of the compound 2,4-dinitrophenol (DNP) to the diet of rats on the growth and development of the animals. The results show that the addition of DNP to the diet of rats leads to a significant increase in the growth rate of the animals and to a significant increase in the weight of the animals. The results also show that the addition of DNP to the diet of rats leads to a significant increase in the weight of the animals.
