Research and Advanced Technology for Digital Libraries Andreas Rauber, Stavros Christodoulakis, A Min Tjoa, 2005-09-27. Since its inception in 1997, the European Conference on Research and Advanced Technology for Digital Libraries (ECDL) has come a long way, creating a strong interdisciplinary community of researchers and practitioners in the field of digital libraries. We are proud to present the proceedings of ECDL 2005, the ninth conference in this series, which followed Pisa 1997, Heraklion 1998, Paris 1999, Lisbon 2000, Darmstadt 2001, Rome 2002, Trondheim 2003, and Bath 2004, took place on September 18-23, 2005, in Vienna, Austria. ECDL 2005 featured separate calls for paper and poster submissions, resulting in 130 full papers and 32 posters being submitted to the conference. All papers were subject to a thorough peer review process with an 87-person strong Program Committee and a further 68 additional reviewers from 35 countries from basically all continents sharing the tremendous review load, producing between three and four detailed reviews per paper. Based on these, as well as on the discussion that took place during a one-week online PC discussion phase, 41 papers were finally selected for inclusion in the conference program during a 1.5-day PC meeting, resulting in an acceptance rate of only 32%. Furthermore, 17 papers

submissions were accepted for poster presentations with an additional 13 posters being accepted based on a simplified review process of 2-3 reviews per poster from the poster submission track. Both the full papers as well as extended abstracts of the posters presented at ECDL 2005 are provided in these proceedings.
