Leading up to the financial crisis of 2008 and onwards the shortcomings of traditional models of regional economic and environmental development had become increasingly evident Rooted in the idea that policy is an encumbrance to free markets the stress on supply side smoothing measures such as clusters and an over reliance on venture capital the inadequacy of existing orthodoxies has come to be replaced by the notion of Transversality This approach has three strong characteristics that differentiate it from its failing predecessor First as the name implies it seeks to finesse horizontal knowledge interactions as well as vertical ones thus building platforms of industrial interaction Secondly it is not a supply but a demand side model in which needs driven innovation rather than pure market competition prevails Finally it is ongoing through recessionary times being more robust than over specialised approaches to economic growth The intellectual origins of Transversality lie in an aspiration to promote eco innovation one of the key hopes of assisting Western regional and national economies to re balance and escape recession The policy models of key regional exponents of the concept are explored and their goals achievement is assessed An array of policy instruments and measures is presented for hands on policy implementation The book will be of vital interest to academics as teachers and researchers as well as policy advisers and public servants

Neuro Nikolas Rose, Joelle M. Abi-Rached, 2013-02-21 How the new brain sciences are transforming our understanding of what it means to be human The brain sciences are influencing our understanding of human behavior as never before from neuropsychiatry and neuroeconomics to neurotheology and neuroaesthetics Many now believe that the brain is what makes us human and it seems that neuroscientists are poised to become the new experts in the management of human conduct Neuro describes the key developments theoretical technological economic and biopolitical that have enabled the neurosciences to gain such traction outside the laboratory It explores the ways neurobiological conceptions of personhood are influencing everything from child rearing to criminal justice and are transforming the ways we know ourselves as human beings In this emerging neuro ontology we are not determined by our neurobiology on the contrary it appears that we can and should seek to improve ourselves by understanding and acting on our brains Neuro examines the implications of this emerging trend weighing the promises against the perils and evaluating some widely held concerns about a neurobiological colonization of the social and human sciences Despite identifying many exaggerated claims and premature promises Neuro argues that the openness provided by the new styles of thought taking shape in neuroscience with its contemporary conceptions of the neuromolecular plastic and social brain could make possible a new and productive engagement between the social and brain sciences

Affective Capitalism Hangwoo Lee, 2023-12-26 Drawing on Tarde's and Deleuze's monadology this book investigates the affective turn of contemporary capitalism The concept of affect provides critical insight to overcome the limitations of social constructivism and cognitive capitalism Affective capitalism transforms the population's everyday bodily experiences into quantitative metrics that can be observed measured and processed on a non-conscious register turning them into individuals prepared to react and be affected by specific information at a given moment In an era where social wealth increasingly relies on the social factory algorithms and big data constitute the living labor beyond employment This book argues that affect also holds a potential for dismantling today's real subsumption of life by capital The network effect mostly actualized as a company's market capitalization is constantly traversed by the molecular becoming of affect leading to new assemblages such as free software movement decentralized platforms peer to peer networking blockchain and universal basic income
