Financing the Entrepreneurial Venture Paul A. Gompers, 2024-06-04 Financing the Entrepreneurial Venture focuses on financial management within entrepreneurial firms. Most of these are young firms, although some are more established. The book examines these firms at all phases of their life cycle from the initial idea generation to the ultimate harvesting of the venture. The book covers firms in a diverse set of industries including high technology, low technology, and services. A significant fraction of the cases focus on non U.S. ventures. Additionally, the issues of gender and diversity are addressed in a number of settings.

Subcommittee on Parks, Recreation, and Renewable Resources, 1980 *Bold Ventures* S. Raizen, E.D. Britton, 1996-12-31 This book presents comprehensive results from case studies of five innovations in science education that have much to offer toward understanding current reforms in this field. Each chapter tells the story of a case in rich detail with extensive documentation and in the voices of many of the participants: the innovators, the teachers, the students. Similarly, Volume 3 of *Bold Ventures* presents the results from case studies of five innovations in mathematics education. Volume 1 provides a cross case analysis of all eight innovations. Many U.S. readers certainly will be very familiar with the name of at least one, if not all, of the science innovations discussed in this volume, for example, Project 2061, and probably with their general substance. Much of the education community's familiarity with these arises from the project's own dissemination efforts. The research reported in this volume, however, is one of the few detailed studies of these innovations undertaken by researchers outside the project themselves. Each of the five studies was a large-scale effort involving teams of researchers over three years. These teams analyzed many documents, attended numerous critical project meetings, visited multiple sites, conducted dozens of individual interviews. The team leaders, Atkin, Huberman, Rowe, having spent much time with science education over long careers, looked at these innovations through many lenses. It was a daunting task for each team to sift through the mountains of detail in order to bring the most compelling themes to the surface.

Nurturing Science-based Ventures Ralf W. Seifert, Benoît F. Leleux, Christopher L. Tucci, 2008-01-25 Few would deny that small entrepreneurial firms play an important economic and social role Not only do they generate a significant number of jobs but they also contribute a large proportion of gross national product GNP Not all small firms qualify as entrepreneurial entities however While small refers mostly to size entrepreneurial refers to growth and a value creation orientation The vast majority of small firms have no growth aspirations nor do they have the means and skills to grow As such they may still provide employment and local value but would not embrace the high potential aspirations of entrepreneurial ventures This book clearly addresses those entrepreneurs who are interested in leading hi growth potential companies Table 1 Table 1 Growth Typology of Small Firms 1 Type of venture Desired sales range Future employees Lifestyle 0 to 1 million 0 to 4 Smaller high potential 1 million to 20 million 5 to 50 High potential over 20 million Over 50 High innovation technology based startups assume a very special role in hi growth entrepreneurship Although these startups constitute a comparatively low number of small businesses they produce proportionately far more jobs than their low and medium innovation counterparts The aim of achieving rapid growth is typically referred to as high expectation entrepreneurship An area of major concern to us is a fact revealed in the latest GEM report The rate of European hi expectation entrepreneurial activity is among the lowest in the world **Business Quiz Book** Dr. R.
