1. The first step is to identify the problem that the entrepreneur is facing. This could be a lack of capital, a lack of market, or a lack of talent.
2. The second step is to develop a plan to solve the problem. This could involve raising capital, finding a new market, or hiring new talent.
3. The third step is to implement the plan. This could involve reaching out to investors, finding new customers, or hiring new employees.
4. The fourth step is to evaluate the results. This could involve tracking sales, monitoring expenses, or conducting surveys.
5. The fifth step is to adjust the plan as needed. This could involve changing the marketing strategy, adjusting the pricing, or hiring more staff.

Abstract. This empirical research study addresses the question of whether the use of a computer-based decision support system (DSS) affects the quality of the decision-making process. The study was conducted in a laboratory setting using a simulated decision-making task. The results of the study indicate that the use of a DSS significantly improved the quality of the decision-making process, as measured by the number of errors and the time taken to reach a decision. The study also found that the use of a DSS significantly improved the quality of the decision-making process, as measured by the number of errors and the time taken to reach a decision. The study also found that the use of a DSS significantly improved the quality of the decision-making process, as measured by the number of errors and the time taken to reach a decision.
