

V^x810 Overview

This chapter provides a brief description of the V^x810. The V^x810 is a customer-facing premium PIN pad brought about by VeriFone's innovative Purpose Inspired Design program which focuses on real-world usage.

Apart from its sleek, compact, and functional design, the V^x810 features a triple-track, high coercivity magnetic stripe reader (MSR) and a Smart Card reader, both built and proven to perform consistently, even under the heaviest volumes. It also has an SD card slot for supporting application download via SD memory card. The SD card slot also serves as an SDIO expansion port to simplify upgrades to contactless or other emerging technologies – without replacing the PIN pad.

The V^x810 also offers an array of connectivity options all from a single port (including serial, USB, or optional Ethernet) so you can connect to almost any device or ECR. Plus, the V^x810 gives you the option to add a base unit with a printer and modem to create a fully-loaded payment solution with a hand-over PIN pad – all in one single device.

Figure 1 The V^x810

NOTE

VeriFone ships variants of the V^x810 for different markets. Your device may have a different configuration. For example, the V^x810 may or may not have a PSCR; it may or may not have an MSR; it may have none or 3 SAMs; flash ROM size may be from 4MB, to 8MB or 16MB; and SRAM size may be from 2MB to 4MB. However, the basic processes described in this guide remain the same, regardless of configuration.
