Understanding Architecture , *Building from Tradition* Elizabeth M. Golden, 2017-12-22 *Building from Tradition* examines the recent resurgence of interest in the handmade building and the use of local and renewable materials in contemporary construction In the past raw materials were shaped to provide shelter and to accommodate the cultural social and economic needs of individuals and communities This is still true today as architects engineers and builders turn once again to local resources and methods not simply for constructing buildings but also as a strategy for supporting social engagement sustainable development and cultural continuity *Building from Tradition* features global case studies that allow readers to understand how building practices developed and refined by previous generations continue to be adapted to suit a broad range of cultural and environmental contexts The book provides a survey of historical and technical information about geologic and plant based materials such as stone earth reed and grass wood and bamboo 24 detailed case studies examining the disadvantages and benefits to using traditional materials and methods and how they are currently being integrated with contemporary construction practices **Architecture in the United States** Dell Upton, 1998 From Native American sites in New Mexico and Arizona to the ancient earthworks of the Mississippi Valley to the most fashionable contemporary buildings of Chicago and New York American architecture is incredibly varied In this revolutionary interpretation Upton examines American architecture in relation to five themes community nature technology money and art 109 illustrations 40 linecuts Map **The Vernacular Architecture of Brittany** Gwyn I. Islamic Heritage Architecture and Art III J. Casares, S. Dominguez Amarillo, 2020-08-11 Islamic architecture has enriched design with a wide variety of structural shapes including among others unique arches a wide variety of vaults and domes which allow for new forms to be developed The influence that these structural forms have in non Islamic countries was one of the themes of the 3rd International Conference on Islamic Heritage Architecture and Art at which the included papers were presented There is much to learn from past experiences to arrive at solutions which are environmentally sound and sustainable in the long term As conventional energy resources become scarce the Islamic design heritage can offer

invaluable lessons on how to deal in an efficient manner with cases of hard and extreme environments Traditional architecture and urban environments in most Islamic countries are now being eroded by overemphasis on a global type of architecture and city planning As a consequence many regions are losing their identity It will become increasingly important for new developments to take light of what the classical Islamic urban designs and architectures have to offer modern society An equally important aspect covered is the analysis of the materials employed and the types of structural elements particularly those unique to Islamic architecture Preserving this heritage requires the development of appropriate conservation techniques in response to the different materials used and the ways structural forms work including under extreme conditions such as earthquakes These papers deal with the design of many types of buildings in Islamic countries including not only the better known public buildings like mosques mausolea citadels and forts but also houses and gardens engineering works such as bridges and dams irrigation systems and many others which have also had a profound impact on society

Akrotiri Thera Clairry Palyvou,2005-12-30 It was long felt that an English edition on the architecture of Akrotiri dealing not only with the building technology but also with issues of typology form and function would be welcomed The present book is thus an attempt to provide the reader with an overall picture of the architecture of Akrotiri including an outline of its town plan a description of the individual houses and a discussion of its relationship with Crete and its neighbors in the Eastern Mediterranean The book is based on the author s personal observations and experience obtained over a fifteen year period 1977 1992 of work at the site as the architect of the Akrotiri excavation This book is confined to the last phase of habitation and the uniquely preserved houses that are seen today *History, Performance and Conservation* Barry Bridgwood,Lindsay Lennie,2013-09-13 Ideal for students of architectural technology this volume of the Technologies of Architecture series covers the technologies available and the processes necessary for the conservation of existing buildings and environments This book provides in a single text the tools for students to be able to evaluate such buildings as well as an extensive understanding of the mechanisms which cause their deterioration and knowledge of the technologies available to correct their status The ever higher standards set for buildings especially in energy conservation contexts demand that practitioners appreciate how the performance of existing structures can be enhanced which is also covered Considering the work of conservation within a holistic perspective and historical context this book is additionally invaluable for architecture and construction students

Eco-architecture III Santiago Hernández,2010-03-16 This book contains most of the papers presented in the Eco Architecture 2010 conference which was the third edition of the International Conference on Harmonisation between Architecture and Nature Previous editions that were very successful were held previously in the New Forest UK in 2006 and the Algarve Portugal in 2008 and demonstrated the importance of a forum like this to discuss the characteristics and challenges of such architectural vision Eco Architecture implies a new approach to the design process intended to harmonise its products with nature This involves ideas such as minimum use of energy at each stage of the

building process taking into account the amount required during the extraction and transportation of materials their fabrication assembly building erection maintenance and eventual future recycling Presentations in the conference were related to topics like building technologies design by passive systems design with nature ecological and cultural sensitivity life cycle assessment quantifying sustainability in architecture resources and rehabilitation and issues from education research and practice Case studies from different places around the world were also presented

Stone Houses of Jefferson County Maureen Hubbard Barros, Brian W. Gorman, Robert A. Uhlig, 2015-05-11 Jefferson County New York has one of the richest concentrations of stone houses in America As many as 500 stone houses churches and commercial buildings were built there before 1860 Some of the buildings are beautiful mansions built by early entrepreneurs others are small vernacular farmhouses Some are clustered together others dot the countryside near stone outcroppings Embedded in the fabric of each building are the stories of its location its maker and its inhabitants over time Lavishly illustrated with almost 300 photographs this volume highlights eighty five stone houses in the region The editors explore both the beauty and permanence of the stonework and the courage and ambition of the early dwellers They detail the ways in which skilled masons utilized local limestone and sandstone crafting double faced stone walls to protect against fire and harsh winters The book includes discussions of the geology of the region the stone buildings that have been lost and the preservation and care of existing structures *Stone Houses of Jefferson County* provides a fascinating look at the intrinsic beauty of these buildings and the historical links they provide to our early settlement

Topophilia and Topophobia Xing Ruan, Paul Hogben, 2020-10-28 This book is about the love and hate relations that humans establish with their habitat which have been coined by discerning modern thinkers as topophilia and topophobia Whilst such affiliations with the topos our manmade as well as natural habitat have been traced back to antiquity a wide range of twentieth century cases are studied here and reflected upon by dwelling on this framework The book provides a timely reminder that the qualitative aspects of the topos sensual as well as intellectual should not be disregarded in the face of rapid technological development and the mass of building that has occurred since the turn of the

millennium Topophilia and Topophobia offers speculative and historical reflections on the human habitat of the century that has just passed authored by some of the world's leading scholars and architects including Joseph Rykwert Yi Fu Tuan Vittorio Gregotti and Jean Louis Cohen Human habitats ranging broadly from the cities of the twentieth century highbrow modern architecture both in Western countries and in Asia to non architect planner designed vernacular settlements and landscapes are reviewed under the themes of topophilia and topophobia across the disciplines of architecture landscape studies

philosophy human geography and urban planning **Museums and Anthropology in the Age of Engagement** Christina Kreps, 2019-10-18 Museums and Anthropology in the Age of Engagement considers changes that have been taking place in museum anthropology as it has been responding to pressures to be more socially relevant useful and accountable to diverse communities Based on the author's own research and applied work over the past 30 years the book gives examples of the wide ranging work being carried out today in museum anthropology as both an academic scholarly field and variety of applied public anthropology While it examines major trends that characterize our current age of engagement the book also critically examines the public role of museums and anthropology in colonial and postcolonial contexts namely in the US the Netherlands and Indonesia Throughout the book Kreps questions what purposes and interests museums and anthropology serve in these different times and places Museums and Anthropology in the Age of Engagement is a valuable resource for readers interested in an historical and comparative study of museums and anthropology and the forms engagement has taken It should be especially useful to students and instructors looking for a text that provides in one volume a history of museum anthropology and methods for doing critical reflexive museum ethnography and collaborative work **The Interior**

Architecture Theory Reader Gregory Marinic, 2018-01-17 The Interior Architecture Theory Reader presents a global compilation that collectively and specifically defines interior architecture Diverse views and comparative resources for interior architecture students educators scholars and practitioners are needed to develop a proper canon for this young discipline As a theoretical survey of interior architecture the book examines theory history and production to embrace a full range of interior identities in architecture interior design digital fabrication and spatial installation Authored by leading educators theorists and practitioners fifty chapters refine and expand the discourse surrounding interior architecture

Technologies for Sustainable Development Jean-Claude Bolay, Silvia Hostettler, Eileen Hazboun, 2013-08-04 Whilst scientific research can be crucial in guiding innovation and development throughout the world it can be too detached from real world applications particularly in developing and emerging countries Technologies for Sustainable Development brings together the best 20 papers from the 2012 Conference of the EPFL UNESCO Chair in Technologies for Development with the aim to explore and discuss ways to link scientific research with development practices to assist practitioners and reply directly to social needs In order for technologies to be adopted it is not sufficient that they are low cost and affordable but also socially culturally and environmentally accepted by the intended users Technologies for Sustainable Development aims

to explore and answer the following three questions What is an appropriate technology How can we ensure a sustainable integrated development What are the conditions for co creation and transfer of such technologies Focusing on the importance of improving working relationships between stakeholders researchers and decision makers between scientists and industrial sectors between academics and the population Technologies for Sustainable Development opens a dialogue necessary to create and implement the best solutions adapted to social demands

Architecture, Theology, and Ethics Elise M. Edwards, 2024-03-18 Architecture Theology and Ethics Making Architectural Design More Just argues that architecture design and creativity are theological ethical concerns that ought to be considered more deeply by Christians who are committed to social and environmental justice Elise M Edwards discusses the significance of architectural design entering into ongoing conversations in theological ethics and aesthetics She argues that architectural design is not just a professional practice for wealthy clients but rather an activity that everyday people undertake when making choices that shape the spaces they inhabit If Christians think theologically about their agency in these decisions they will discover that architectural design becomes an opportunity to contribute to the flourishing for humanity and God s creation Edwards proposes an approach to architectural design that presents it as prophetic action with the power to shape our world This book then presents five moral commitments that guide design intentions and the process of design towards justice and inclusion Grounded in liberationist feminist and womanist thought Architecture Theology and Ethics makes a compelling case for architecture s relevance to Christian ethics and theology

The New Cambridge Medieval History: Volume 6, C.1300-c.1415 Rosamond McKitterick, 1995 The sixth volume of The New Cambridge Medieval History covers the fourteenth century a period dominated by plague other natural disasters and war which brought to an end three centuries of economic growth and cultural expansion in Christian Europe but one which also saw important developments in government religious and intellectual life and new cultural and artistic patterns Part I sets the scene by discussion of general themes in the theory and practice of government religion social and economic history and culture Part II deals with the individual histories of the states of western Europe Part III with that of the Church at the time of the Avignon papacy and the Great Schism and Part IV with eastern and northern Europe Byzantium and the early Ottomans giving particular attention to the social and economic relations with westerners and those of other civilisations in the Mediterranean

The Environments of Architecture Randall Thomas, Trevor Garnham, 2007-09-13 This well illustrated think piece provides a much needed and topical philosophical introduction to the place of environmental design in architecture The Environments of Architecture sets out a range of considerations necessary to produce appropriate internal environments in the context of a wider discussion on the effect of building decisions on the broader environment The authors from architecture and engineering academia and practice provide a rounded and well balanced introduction to this important topic Starting from a belief that the built environment can contribute more positively to the planet and the pleasure of places as well as answering the practical demands of comfort

they cover site planning form materials construction and operation as well as looking at design on a city level Presenting a thoughtful and stimulating approach to the built environment this book forms an excellent guide for practitioners students and academics concerned with our built environment **Architecture, Technology and Process** Chris Abel, 2007-03-30

This new selection of essays follows Chris Abel's previous best selling collection *Architecture and Identity* Drawing upon a wide range of knowledge and disciplines the author argues that underlying technological changes in the process of architectural production are fundamental changes in the way we think about machines and the world we live in Key topics include new patterns of urbanism in the fast growing cities of Asia Pacific metaphorical extensions of mind and body in cyberspace the divergent European and North American values shaping Sir Norman Foster's and Frank Gehry's work and the collaborative work methods and technologies creating the adaptable design practices of today
