Computer viruses United States. Congress. House. Committee on Energy and Commerce. Subcommittee on Telecommunications and the Internet, 2003 *Fancy Bear Goes Phishing* Scott J. Shapiro, 2023-05-23 Unsettling absolutely riveting and for better or worse necessary reading Brian Christian author of *Algorithms to Live By* and *The Alignment Problem* An entertaining account of the philosophy and technology of hacking and why we all need to understand it It is a signal paradox of our times that we live in an information society but do not know how it works And without understanding how our information is stored used and protected we are vulnerable to having it exploited In *Fancy Bear Goes Phishing* Scott J. Shapiro draws on his popular Yale University class about hacking to expose the secrets of the digital age With lucidity and wit he establishes that cybercrime has less to do with defective programming than with the faulty wiring of our psyches and society And because hacking is a human interest story he tells the fascinating tales of perpetrators including Robert Morris Jr the graduate student who accidentally crashed the internet in the 1980s and the Bulgarian Dark Avenger who invented the first mutating computer virus engine We also meet a sixteen year old from South Boston who took control of Paris Hilton's cell phone the Russian intelligence officers who sought to take control of a US election and others In telling their stories Shapiro exposes the hackers tool kits and gives fresh answers to vital questions Why is the internet so

vulnerable What can we do in response Combining the philosophical adventure of G del Escher Bach with dramatic true crime narrative the result is a lively and original account of the future of hacking espionage and war and of how to live in an era of cybercrime Includes black and white images

prolonged awareness raising campaign to increase public understanding of personal online security Eighty per cent of protection against cyber attack is routine IT hygiene yet currently there is no single first point of advice and help for consumers and much of the online information about internet security is often technical or jargon filled Television exposure is crucial to gain the widest possible exposure to the safety message and more should be done to promote and resource the existing Government website Get Safe Online Advice from Get Safe Online should be provided with every device capable of accessing the internet and all Government websites should link to the website and highlight the latest security updates The provision of Government services by the digital by default policy will increasingly require those in receipt of Government benefits and services to access these online The Committee raises concerns that the scheme will be of greater use in protecting the Government against welfare fraud than the individual user against crime The Government should investigate the potential for imposing statutory safety standards if the industry cannot demonstrate that voluntary self regulation can improve security
