Empowering Municipal Sustainability Alexandra Reed Lajoux,2021-11-08 Amidst growing awareness over the past half century that human activity threatens our natural environment many of the world s largest cities have played a role in the sustainability movement as

seen by such initiatives as Day of Cities sponsored by the United Nations And now local governments in towns and smaller cities are beginning to play a more prominent role in the green movement This book inspired by the author s own experience as a citizen activist and local candidate is a guide for local governments and citizens wishing to launch sustainability campaigns and programs that make a lasting difference in our world Alexandra Reed Lajoux addresses the popular green city topic but focuses on smaller municipalities which are more numerous than big cities and in greater need of guidance With a visionary foreword by Ben G Price National Organizer Community Environmental Legal Defense Fund and author of How Wealth Rules the World the book discusses the most critical environmental economic and engineering realities of municipal life and leadership in our times ranging from rights of nature to rollback tax rates to green infrastructure to gentrification It will appeal to a broad range of town or city government employees and elected officials as well as local activists contemplating the issues of managing and funding sustainability that all localities worldwide face at some level

Coastal Engineering VI C. A. Brebbia, David Almorza Gomar, F. Lopez Aguayo, 2003 The pollution and general degradation of coastal areas have become problems of major international concern while the related environmental problems need further study in order to implement effective remedial action Moreover the design and construction of developments necessary for navigation such as harbours and marinas require an accurate knowledge of sea climate especially in cases of extreme conditions

Risk and Insurance in Construction Nael G. Bunni, 2003-09-02 Those involved in construction have to cope with so much learning in their own discipline that they shun further involvement in subjects such as insurance and law which in themselves are so deeply and intensely complex However insurance and law are interwoven in the basic procedures used in the construction industry for undertaking work be they design construction supervision or operation or any combination of them This thoroughly revised edition of Nael Bunni s successful book formerly called Insurance in Construction provides information on risk construction law and construction insurance for those involved with all aspects of construction The chapters on risk have been expanded to include recent developments in the area and provide further examples of events which could occur on what can be viewed as the most risky human work activity namely construction New chapters are also added to deal with the insurance clauses of the many new standard forms of contract published in recent years including FIDIC s new suite of contracts published in September 1999 ICE s seventh edition of the civil engineering standard form of contract and ICE s second edition of the design build form
