

Excel Skill Check – Module 3

Complete the tasks below as accurately and efficiently as possible. Screenshots show the finished product, but are useful to refer to along the way. **IMPORTANT:** No assistance of any kind is allowed for Skill Checks. **NOTE:** If a function is specified, no credit will be given if a function is not used. When in doubt about any aspect of a skill check, please ask for clarification.

1	Copy the Excel Skill Check Starting File to the desktop. Use the desktop as your working location. Save the file <i>Excel Skill Check 3 Starting File.xlsx</i> as Firstname Lastname Camping.xlsx
2	- Not shown in screenshots: On the Documentation sheet, enter your name as author, and enter a <u>function</u> that will always display the current date when the spreadsheet is opened. Accept the default date format. - Note the purpose of the workbook. - All remaining work takes place on the Order Form sheet.
3	On the Order Form sheet, in cell B6, enter a simple formula that references (points to) the date on the Documentation sheet.
4	- When the sale is made to the customer name of CASH, no Shipping Address information is required. - In cell B4, enter the text "CASH". - In cell B10, use a <u>function</u> to display "NO" if cell B4 has the word "CASH" in it, and "YES" if it doesn't.
5	- In cell B20, choose "Standard" delivery from the dropdown list. - In cell B21, use a <u>function</u> that will look up the estimated number of delivery days in the list found in range F5:H9 for the delivery method shown in cell B20 (e.g., for Standard delivery, the estimated number of delivery days is 5).
6	Note: To simulate a sales transaction, the first 8 items from the Product List have been pasted into the Order Table for you, and test quantities have been entered. No action required.
7	- In cell H14, enter a formula that calculates the charge for the first product. - Copy the formula to the other 7 rows in the Order Table.
8	- In cell I14, enter a formula to calculate the tax. REQUIRED: Formula must reference cell H14 and cell G11, in such a way that the formula will fill down without errors for the remaining items in the table. - Copy the formula to the other 7 rows in the Order Table.
9	- In cell J14, enter a formula or function to calculate the item total including tax. - Copy the function or formula to the other 7 rows in the Order Table.
10	In cell J23, enter a <u>function</u> that calculates the subtotal for the items sold. Do NOT include any blank cells in the range selected for the function.
11	In cell J26, use a formula or function to calculate the total cost of the order. Do not include any blank cells or non-numeric data in your calculation.
12	- Check your work carefully to ensure you have completed all parts to the best of your ability. - Indicate to your instructor that you are ready to have your work marked.
13	After being marked, delete the Skill Check files from the desktop. Do not save a copy or move files to your H: drive. If you had any difficulties, review those concepts as soon as possible!

Gustafson, 2006-11-15

Should we invest in a new electronic health record system What public policy should we develop to tackle this health issue What are the root causes for medical errors in our facility Should our hospital merge with another organization This book will help you build the skills you need to answer complex management and policy questions The first part of the book explains the various analytical tools that simplify and accelerate decision making Learn about tools that help you determine causes evaluate choices and forecast future events For occasions when a group rather than an individual has to make a decision you will also learn what tools can help you create group consensus The second half of the book shows you how to apply analytical tools to different healthcare situations including comparing clinician performance determining the causes for medical errors analyzing the costs of programs and determining the market for new services Many practical examples walk you step by step through common decision making scenarios Companion website enhances learning and clarifies concepts Access a comprehensive companion website that includes additional tools for building decision making skills At the companion website you can Listen to narrated lectures of key points View students examples of rapid analysis exercises Follow animated examples of how to use computer programs to conduct an analysis Link to websites that provide additional information including access to software and online tools that aid decision analysis Download PowerPoint slides that highlight important concepts of each chapter **Excel Basic Skills** A. S. Kalra, 1998

Excel Maths Addition and Subtraction for Year 3 and Year 4 is designed to help make students feel confident in the basic processes of addition and subtractions of whole numbers It will help to satisfy the needs of slower learners and provide enrichment opportunity for quicker learners Mathematics is a highly important subject in our school syllabus It is the study of numbers which surround us everywhere in our lives Computers and calculators have become the order of the day and are quite handy but the human mind still controls it all Whatever we put into the mind during the child's formative years is extremely important and most significant for the years to come In this book your child will find eight self contained

carefully graded units hundreds of practice exercises quick questions and revision pages to stay in touch with previous work diagnostic and mastery tests to measure students knowledge a lift out answer section

Professional Studies: Primary and Early Years Kate Jacques, Rob Hyland, 2007-09-03 This key resource for trainee primary teachers helps them to understand and fulfil the new professional requirements for QTS It focuses on a range of professional issues including management of pupils work individual needs and equal opportunities behaviour for learning and professional responsibilities outside teaching Each chapter includes tasks examples and further reading to highlight important concepts and key issues New and revised chapters mean this third edition is up to date with the QTS Standards latest documents and initiatives Further new reflective tasks and Moving On sections help trainees to build on the information in each chapter

Intermediate Microeconomics Steve Erfle, 2017-09-14 The overarching premise of this text is that microeconomics is most effectively learned in an active learning interactive environment Students have access to more than 200 Interactive Excel Figures in the online text that allow them to move the graphs using sliders and click boxes This interactivity helps students understand how graphic elements relate to one another These files do not require knowledge of Excel More figures than are typical and many of the figures involve multiple scenarios of the same basic graph Often the text employs interactive questions that require interpreting these scenarios questions posed are answered at the bottom of the page Despite the geometric orientation this text is not light on algebraic analysis The geometry is backed up by the relevant algebra More than 500 equations are numbered for easy reference both within and across chapters And just like the geometry the algebra is essentially error free because it was used to create the graphs The geometric orientation is perfect for the non calculus enhanced classroom but the text can be readily used in a calculus based class because a calculus treatment of the material is provided in appendices and endnotes and calculus based problems are included in the Intermediate Microeconomics An Interactive Approach Workbook

Forensic Analytics Mark J. Nigrini, 2011-06-07 Discover how to detect fraud biases or errors in your data using Access or Excel With over 300 images Forensic Analytics reviews and shows how twenty substantive and rigorous tests can be used to detect fraud errors estimates or biases in your data For each test the original data is shown with the steps needed to get to the final result The tests range from high level data overviews to assess the reasonableness of data to highly focused tests that give small samples of highly suspicious transactions These tests are relevant to your organization whether small or large for profit nonprofit or government related Demonstrates how to use Access Excel and PowerPoint in a forensic setting Explores use of statistical techniques such as Benford's Law descriptive statistics correlation and time series analysis to detect fraud and errors Discusses the detection of financial statement fraud using various statistical approaches Explains how to score locations agents customers or employees for fraud risk Shows you how to become the data analytics expert in your organization Forensic Analytics shows how you can use Microsoft Access and Excel as your primary data interrogation tools to find exceptional irregular and anomalous records
