

## Section 3.1: Early Atomic Theories and the Origins of Quantum Theory

### Research This: The Large Hadron Collider, page 141

**A.** String theory is a theory of matter that describes sub-atomic particles as strings. Grand unified theory is an attempt to unite the fundamental forces of nature: electromagnetic force, gravity, weak nuclear force, and strong nuclear force.

**B.** Answers may vary. Sample answer: The LHC and ATLAS projects are worth the enormous amount of money because the information collected will improve our knowledge of sub-atomic particles and will improve our understanding of the components of the universe.

**C.** Answers may vary. Students' answers should allow the audience to learn about the basic concepts that are involved in the LHC and ATLAS research projects.

**D.** Answers may vary. Sample answer: Further investments in these projects and this type of research should be continued because this type of research requires massive collaboration and funding. By funding this type of pure experimentation, scientific knowledge can be advanced in unexpected ways.

**Lifting the Scientific Veil** Paul Sukys, 1999 Lifting the Scientific Veil has been written to afford the nonscience student the same meaningful opportunity to explore germane scientific topics as is generally given the science student to learn about the humanities and social sciences Since nonscientists are generally responsible for making laws financing research or at the very least for voting it is essential that they understand the significant impact that science has on everyday life The book is designed to introduce nonscientists in an informative and comprehensible manner to four of the most significant scientific theories of the twentieth century the big bang quantum physics relativity and evolution After each theory is explained informally the book shows how that theory and related technology impact upon one's personal life Legal and political aspects of these theories are explored as well as philosophical and theological implications **Solutions Architect Interview**
