Changing Assessments Bernard R. Gifford, Mary Catherine O'Connor, 2012-12-06 Bernard R Gifford As we edge toward the year 2000 the information age is a reality the global marketplace is increasingly competitive and the U S labor force is shrinking Today more than ever our nation s economic and social well being hinges on our ability to tap our human resources to identify talent to nurture it and to assess abilities and disabilities in ways that help every individual reach his or her full potential In pursuing that goal decision makers in education industry and government are relying increasingly on standardized tests sets of question with identical directions time limits and tasks for all test takers designed to permit an inference about what someone knows or can do in a particular area

CALIBRATING DIFFERENCE Our emphasis on standardized testing rests on a premise that is so basic it often escapes notice that we humans are different from each other in ways that are both meaningful and measurable We differ in terms of cognitive ability aptitude for performing different kinds of mental and physical tasks temperament and interests But somehow without sufficient examination we have taken a great collective leap from that commonplace to the notion that there are precise measurable gradations of innate ability that can be used to direct children to the right classrooms and adults to the right job slots

Handbook of Intellectual Styles Li-fang Zhang, Robert J. Sternberg, Stephen Rayner, PhD, 2012 Because of the thoroughness of the literature reviews and the comprehensive coverage of the chapter topics this book should be required reading for any scholar working in related areas of personality or intelligence

PsycCRITIQUES This book is a masterly attempt to bring order and cohesion to a field that for many years has been riven with claims and counterclaims The editors and authors are to be congratulated for addressing a very complex task so helpfully John Biggs PhD Honorary Professor of Psychology University of Hong Kong If you are interested in intellectual styles people s preferred ways of processing information then this book belongs on your bookshelf

Richard E Mayer PhD Professor of Psychology University of California Santa Barbara For more than half a century the construct of style whether designated as cognitive thinking or learning has been in or out of fashion in the history of psychology and education The editors of the present Handbook have invigorated the style construct in the form of intellectual

styles and have brought together a distinguished international panel of chapter authors who offer up to date surveys of the assessment development correlates and educational and organizational applications of intellectual styles For those seeking to familiarize themselves with current theory and research in an intellectually exciting field the present Handbook is essential

Nathan Kogan PhD Professor Emeritus Department of Psychology New School for Social Research New York NY The concept of intellectual styles has had a controversial history based on diverse philosophical and theoretical foundations Most recently the idea of intellectual styles an umbrella term that covers such closely related constructs as cognitive styles learning styles teaching styles and thinking styles has gained momentum as an explanation for why different people succeed in different professional and organizational settings Previously it was thought that high achievers simply had more innate abilities than their less successful peers but research has shown that individuals have different intellectual styles that are better suited for varying types of contexts and problems Based on the most current and expansive research this handbook is the first to provide a comprehensive review of research on the construct of intellectual style from its foundations and development to its relations to allied constructs its roles in school and job performance its applications in various populations and its future This understanding of intellectual styles as a valid concept for both individuals and groups has far reaching implications for researchers in cross cultural psychology multicultural education organizational behavior and work performance and many other academic disciplines as well as practitioners in education and beyond

Key Features Provides a comprehensive review of intellectual styles from multiple perspectives Written for students and scholars in diverse academic arenas as well as practitioners in education and other fields Includes contributions from researchers from diverse disciplines such as psychology business education and health sciences

Learning Styles and Second Language Education Patrycja Marta Kamińska, 2014-06-26 This book contributes to the body of knowledge concerning individual learner differences by addressing the issue of learning styles in developing a second language It comprises five chapters The notion of style together with its place among other individual differences and its relation to learning strategies is presented in Chapter 1 The reasons for researching styles are also delineated in this chapter Chapter 2 describes simple one dimensional models of learning styles contrary to Chapter 3 in which two dimensional compound models are presented Multi dimensional complex models of learning styles are the focus of Chapter 4 Each model discussed in Chapters 2 through 4 is accompanied by an outline of its significance to second language

educators as demonstrated in earlier studies The final fifth chapter is devoted to the discussion of the practical exploitation of the learning style awareness in second language education The options suggested include accommodating learners styles stretching them by exposing the students to the less familiar and less preferred options and mixtures of both approaches The book will be of interest to applied linguists psycholinguists and language teaching practitioners as well as tertiary level students interested in finding out the ways in which learning styles account for linguistic achievement **CIO**,2004-08-01

Translation Studies Mary Snell-Hornby,Franz Pöchhacker,Klaus Kaindl,1994-01-01 A selection of 44 papers out of the 163 presented at the Translation Studies Congress which was held in celebration of the 50th anniversary of the Institut für Dolmetscher und Übersetzer Ausbildung in Vienna shows how translation studies is moving away from purely linguistic analysis into LSP psychology cognition and cultural orientations The volume is divided into sections reflecting the focal subject areas at the Congress Translation history and culture Interpreting theory and training Terminology and special languages Teaching and training in translation Also included are papers from a special workshop including interdisciplinary research projects from Vienna Of the articles 25 are written in English 16 in German and 3 in French Cognitive Styles and Learning Strategies Richard Riding,Stephen Rayner,2013-10-23 First Published in 1998 This book deals with what may well turn out to be the missing element in the study of individual differences cognitive style Its intention is to distinguish between and integrate the research attempts particularly over the past half century to make sense of style differences In several respects this book is unique in that it contains material that is not covered in any other and draws together the various aspects of psychology relevant to the study of individual differences It is in this sense both a textbook and a source of reference for many professionals working in a range of contexts The content of the book has relevance for a wide audience
