Sustainable Intensification of Agriculture Jules Pretty, Zareen Pervez Bharucha, 2018-06-14 Sustainable intensification SI has emerged in recent years as a powerful new conceptualisation of agricultural sustainability and has been widely adopted in policy circles and debates It is defined as a process or system where yields are increased without adverse environmental impact and without the cultivation

of more land Co written by Jules Pretty one of the pioneers of the concept and internationally known and respected authority on sustainable agriculture this book sets out current thinking and debates around sustainable agriculture and intensification It recognises that world population is increasing rapidly so that yields must increase on finite land and other resources to maintain food security It provides the first widely accessible overview of the concept of SI as an innovative approach to agriculture and as a key element in the transition to a green economy It presents evidence from around the world to show how various innovations are improving yields resilience and farm incomes particularly for resource constrained smallholders in developing countries but also in the developed world It shows how SI is a fundamental departure from previous models of agricultural intensification It also highlights the particular role and potential of small scale farmers and the fundamental importance of social and human capital in designing and spreading effective innovations **Agroecology** Stephen R. Gliessman, 2014-12-09 Agroecology is a science a productive practice and part of a social movement that is at the forefront of transforming food systems to sustainability Building upon the ecological foundation of the agroecosystem Agroecology The Ecology of Sustainable Food Systems Third Edition provides the essential foundation for understanding sustainability i

Sustainable food planning: evolving theory and practice André Viljoen, 2023-09-04 Half the world's population is now urbanised and cities are assuming a larger role in debates about the security and sustainability of the global food system Hence planning for sustainable food production and consumption is becoming an increasingly important issue for planners policymakers designers farmers suppliers activists business and scientists alike The rapid growth of the food planning movement owes much to the unique multi functional character of food systems In the wider contexts of global climate change resource depletion a burgeoning world population competing food production systems and diet related public health concerns new paradigms for urban and regional planning capable of supporting sustainable and equitable food systems are urgently needed This book addresses this urgent need By working at a range of scales and with a variety of practical and theoretical models this book reviews and elaborates definitions of sustainable food systems and begins to define ways of achieving them Four different themes have been defined as entry points into the discussion of sustainable food planning These are 1 urban food governance 2 integrating health environment and society 3 urban agriculture 4 planning and design This is an important compilation on a timely topic It brings together the work of planners and designers from both sides of the Atlantic and challenges us to think about how to create food systems that deliver healthy just and sustainable communities and vital places The book moves dexterously between the grassroots and policy halls and draws valuable lessons for theory and practice Dr Kami Pothukuchi Department of Urban Studies Planning Wayne State University To address the problems of urban food production we need to look at the city in a completely different way This timely book will act as an important source for those who have an ethical interest not only in food but in improving the quality and justice of life in our city communities Prof Flora Samuel School of Architecture University of Sheffield and member of Royal Institute of

British Architects Research and Development Committee This publication provides a lot of food for thought not just for persons professionally involved in the food sector and officials dealing with national food policies but especially for local and regional authorities urban planners and architects NGOs and community based organisations health and environmental officers and concerned consumers Against the background of the growing awareness of the elevated social health and ecological costs of the mainstream globalized agri food system this book analyses the emergence of a new vision and many initiatives that seek to reconnect sustainable production with sustainable consumption Hence the book delivers what is promised in its title it discusses new concepts related to food and sustainable urban regional planning based on a critical review of innovative practices at various levels Ir Henk de Zeeuw Director RUAF Foundation For those who work to address the future challenges facing city development this book is a must Why Because today practitioners and professionals are being asked to understand urban food production within a social economic and ecological context This book shows us how these connections are being made The chapters are accessible and fascinating and will help beginners and experts to deal with food production in their everyday work Dr Carlo W Becker bgmr Landscape Architects Berlin Leipzig and Technical Universit *International Review of the Science and Practice of Agriculture* ,1911 **Temperate Agroforestry Systems** Andrew M Gordon,Steven M Newman,Brent Coleman,2018-03-07 Organic animal production has increased rapidly in recent years to keep up with the increasing consumer demand for organic meats There are many guidelines and restrictions on what should go into the feedstuffs of organically farmed animals from which difficulties arise when trying to ensure a well balanced nutritious diet without the use of any supplements The book has been completely updated and revised to address how to formulate organic diets in situations where there is a declining supply of organic feed as well as the feasibility of utilizing novel feedstuffs and their acceptability by consumers of organic meat products Including the experiences of producers in relation to appropriate breeds and production systems for forage based organic production this book is an important read for researchers and students of organic food animal production veterinary sciences and food as well as food industry personnel and organic farmers
