It provides a general introduction to film literacy and explains the rationale, methods, and objectives of working with feature films. In addition, the book contains in-depth considerations on sixteen selected films which are grouped regionally: Australia, New Zealand, South Africa, USA, Great Britain. Each chapter describes the topical focus of the film and its central theme and provides background information on social, historical, political, and geographical issues. A profound analysis of selected scenes lays the foundation for considerations on the teaching potential of the film. In a download section, the chapters are complemented with ready-to-use teaching materials on film-specific aspects: narrative, dramatic, and cinematographic dimensions, which are organised as pre-while-post-viewing activities. A glossary on technical terms for film

Rural Tourism Katherine Dashper, 2015-01-12 Rural regions are experiencing fundamental challenges to their ways of life and social fabric as traditional land based occupations are in decline and younger and better educated rural residents migrate to cities for greater work social and cultural opportunities Rural tourism offers a possible solution to the problems associated with lost economic opportunities and population decline that accompany the waning of agriculture Many governments and regional authorities have embraced rural tourism as an opportunity to bring new money into rural regions stimulating growth providing employment opportunities and thus beginning to halt rural decline However the possibilities of rural tourism to promote rural regeneration have been criticised for being over stated and unrealistic Rural tourism has frequently been found to under deliver in terms of expected economic benefits and job creation and may sometimes exacerbate local hierarchies and inequalities This edited collection questions the contribution tourism can and does make to rural regions Drawing on a range of geographically diverse research driven case studies the book is thematically organised to explore a variety of issues relevant to rural tourism from the perspectives of local communities businesses government policy makers and the tourists themselves

Applying Language Science to Language Pedagogy José Manuel Igoa,Montserrat Sanz,2011-12-08 This book establishes a bridge between current research in Linguistics and Psycholinguistics and language pedagogy in the classroom It reformulates the debates about teaching approaches by calling the reader s attention to discoveries about the structure of grammar the universals of language mind processes while comprehending producing and storing language and facts about learning The popularization of L2 teaching brought with it a need to find efficient teaching methods Debates have hinged mainly around the alleged advantages of communicative vs traditional methods However most approaches have their roots in linguistic and psychological theories that have been questioned by language researchers Some language teachers are probably unaware of these advances and to that

extent continue to adhere to teaching approaches mainly based on intuitions. Consequently evaluating materials may be often performed in rather uninformed circumstances. The book contains chapters on relevant issues by leading researchers classified into three main areas. The editors contribute a chapter to each of these sections about the implications for second language teaching. This book facilitates an approximation between researchers in the theoretical and experimental fields of language and those responsible for innovation in language teaching. It is designed so that L2 teachers can adopt and adjust the knowledge drawn from the book to their particular environment and group of students.
