Study Guide Pk Shona For O Level:

Contrastive Rhetoric in Shona and English Juliet Thondhlana, 2000 The influence of the learner's mother tongue on the use of a second language has long been of interest within applied linguistics. Whilst most studies have focused on the sentence level, contrastive rhetoric has broadened this area of investigation to the levels of discourse and text. This study explores and applies the approach to written English and Shona of Shona native speakers in Zimbabwe. It is both theoretical and practical, highlighting the importance of multi-dimensional and non-evaluative analytical frameworks and providing information for second language teachers and learners.

Age-related Macular Degeneration Frank G. Holz, Daniel Pauleikhoff, Richard F. Spaide, Alan C. Bird, 2012-08-31 Age-related macular degeneration is the most common cause for the loss of central vision beyond the age of 50 in industrial nations. Tripling of the number of affected patients is expected over the next 25 years. Especially over the last years, the standard of knowledge regarding etiology, risk factors, diagnostics, and therapy of this retina illness has substantially grown. This will be covered in this up-to-date multi-authored work. Apart from epidemiologically and genetically identified risk factors, both the various pathophysiological aspects including the role of the complement system and clinical manifestations including OCT and angiographic characteristics are clearly represented. Furthermore, the different therapeutic approaches are presented and discussed, including proven procedures such as intravitreal anti-VEGF therapy and seeing aid systems, in addition to the latest and upcoming methods in the area of pharmacology. The volume is well illustrated and tables and summaries complete the presentation.
