Liu,2024-09-20 Biodiversity can provide a series of important ecosystem functions and ecosystem services which meet the needs of human beings Plants are the biological group with the highest carbon content on earth their diversity has attracted increased attention The interpretation of plant diversity patterns and drivers is crucial for the conservation and utilization of plant resources and is also one of the hot topics in plant science and ecology There are already many studies on the patterns and drivers of plant diversity including different diversity dimensions e g taxonomic phylogenetic and functional diversity and spatial scales different plots sites watershed country continent and globe The mechanisms underlying plant diversity patterns are also quite complex For example many hypotheses are related to contemporary climate and soil conditions with temperature precipitation and soil nutrient being the most discussed drivers In addition paleoclimate and geological events may also have a strong legacy on current plant diversity patterns Except for these natural factors many anthropogenic activities including agriculture deforestation grazing urbanization and coal mining are also important drivers of plant diversity These anthropogenic activities can affect plant diversity patterns not only directly but also indirectly through their effects on habitat loss and habitat fragmentation Therefore the current plant diversity patterns are the result of many interacting factors and need to be interpreted from a more comprehensive perspective This Research Topic will therefore provide a platform for sufficient communication aiming to integrate the research from different fields and deepen the understanding of the patterns and drivers of plant diversity We encourage the submission of theoretical and experimental studies on different plant groups such as seed plants ferns mosses and algae Studies based on new methods and technology such as genomics and drones are also welcomed We welcome the following specific topics Effects of historical factors such as paleoclimate geological events on plant diversity Plant diversity that driven by contemporary climate and anthropogenic activities The effect of habitat loss and fragmentation on plant diversity New methods of research on the patterns and drivers of plant diversity

Biodiversity in Agricultural Landscapes of Southeastern Brazil Carla Gheler-Costa, Maria Carolina Lyra-Jorge, Luciano Martins Verdade, 2016-04-11 The state of S o Paulo Brazil is one of the most densely populated and developed areas in South America Such development is evident both in terms of industrialization and urbanization as well as in agriculture which is heavily based on sugar cane Eucalyptus plantations and livestock This intense land use has resulted in great alteration of the original land cover and fragmentation of natural ecosystems For these reasons it is almost a paradox that jaguar a species that requires large areas of pristine forest to exist is still found in some parts of the state of S o Paulo It is possible that wild animals could leave in coexistence with intense land use or is it the case that such rare encounters with large wild animals in S o Paulo will disappear in the near future All ecologists are aware of the problems of habitat changes caused by humans but it was not until recent years that researchers started to consider that the land used for production could also serve as an important habitat for many different kinds of wild species This book is about this new approach to conservation It also highlights the important role that sciences could and should have in this discussion in order to better understand the problems and propose possible solutions *Understanding plant diversity and evolution in the mediterranean basin* Nico Cellinese, Božo Frajman, Andrew A Crowl, Gonzalo Nieto Feliner, 2023-04-28 **Research in Education**, 1971-12 *Resources in Education*, 1984 [Go To Guide for CUET \(UG\) Biology/ Biological Studies/ Biotechnology/ Biochemistry with 14 Previous Year Solved Papers & 10 Practice Sets 4th Edition | NCERT Coverage with PYQs & Practice Question Bank | MCQs, AR, MSQs & Passage based Questions](#) Disha Experts, Disha s updated 4th edition of the book [Go To Guide for CUET UG Biology Biological Studies Biotechnology Biochemistry with 10 Practice Sets B 10 Practice Mock Tests Part A covers well explained theory in a ONE LINER format which is easy to remember The complete syllabus is divided into 15 Chapters as per NCERT More than 1800 questions are provided for practice with Hints Solutions 2](#)
