Website Manager's Handbook Shane Diffily, 2006 This book presents a practical model for the management and maintenance of your website. Such a site can be of any size and in any industry from an intranet of a few dozen pages to a huge online music store. The fundamentals are the same. Written entirely from the manager's point of view, *The Website Manager's Handbook* provides a roadmap through the neglected issues of site maintenance and governance. The purpose is to equip you with the knowledge you need to make informed decisions. This book has already been described by respected web commentator Gerry McGovern as very clear and well written, a lot of practical depth.

The Survey of College Website Management Practices, 2007-12 The *Survey of College Website Management Practices* a 171 page study presents more than 500 tables of data about college websites and is based on data from 68 North American colleges. The study presents detailed data on budgets, software preferences, editorial control, staff size and composition, use of consultants, plans for website redesign and a broad range of other issues confronting college web site staffs. The report helps to answer questions such as: what kind of disaster management and campus crisis policies do college web staffs have in place? How do staffs track end users and how many visitors are different college web sites attracting? Which college departments are most influential in managing and directing the website? Does the web staff consider itself in charge of content, IT questions or both? How many individuals can enter content to the site without the permission of the webmaster? What role do social networking sites play in the college web staff's future plans? How often does the webmaster review departmental sites and how much control does he/she have over them? How often are major website revisions planned and how are the best results for end user buy in achieved?

Style Guide for Voting System Documentation Dana E. Chisnell, 2009-05 This style guide is a product of the voting system standards and test methods research at NIST. The most recent version of the tech standard, the Voluntary Voting System Guidelines of Aug 2007, contains requirements for the usability of documentation used by poll workers and election support staff. The approach to testing these requirements has two components: 1. Style guide incorporating best practices for voting system documentation. 2. Test protocol for voting system test labs to use to measure the usability of instructions supplied by voting system manufacturers for election workers. This style guide sets out guidelines for voting system manufacturers to use to implement best practices in their documentation for poll workers and election support staff.
