Homeless Advocacy and the Rhetorical Construction of the Civic Home Melanie Loehwing, 2018-10-30 Homeless assistance has frequently adhered to the three hots and a cot model which prioritizes immediate material needs but may fail to address the political and social exclusion of people experiencing homelessness In this study Loehwing reconsiders typical characterizations of homelessness citizenship and democratic community through unconventional approaches to homeless advocacy and assistance While conventional homeless advocacy rhetoric establishes the urgency of homeless suffering it also implicitly invites housed publics to understand homelessness as a state of abnormality that destines the individuals suffering it to life outside the civic body In contrast Loehwing focuses on atypical models of homeless advocacy the meal sharing initiatives of Food Not Bombs the international competition of the Homeless World Cup and the annual Homeless Persons Memorial Day campaign She argues that these modes of unconventional homeless advocacy

provide rhetorical exemplars of a type of inclusive and empowering civic discourse that is missing from conventional homeless advocacy and may be indispensable for overcoming homeless marginalization and exclusion in contemporary democratic culture Loehwing's interrogation of homeless advocacy rhetorics demonstrates how discursive practices shape democratic culture and how they may provide a potential civic remedy to the harms of disenfranchisement discrimination and displacement This book will be welcomed by scholars whose work focuses on the intersections of democratic theory and rhetorical and civic studies as well as by homelessness advocacy groups

Differential Diagnosis and Treatment in Primary Care R. Douglas Collins, 2017-07-18

For more than three decades *Differential Diagnosis and Treatment in Primary Care* has helped primary care practitioners to systematically approach the differential diagnosis of the symptoms and signs they see in practice. Organized into categories such as pain, mass, bloody discharge, non bloody discharge, functional changes, and abnormal laboratory results, this bestselling clinical reference helps you apply your basic science knowledge to consider all of the possible causes of each symptom and then take the appropriate steps to determine which one is most likely. Apply the latest knowledge due to comprehensive updates throughout the text including new signs and symptoms, new and expanded case histories, updated diagnostic tests, and more. Interact with patients more effectively with a new section on bedside manner and get therapeutic guidance from a new section on the treatment of common diseases. Know what to look for thanks to abundant anatomical drawings that highlight relevant features in each body area. Develop your diagnostic skills with cases and clinical questions for each sign or symptom as well as the framework for thinking through those questions to arrive at the appropriate diagnosis. Select the appropriate diagnostic procedures and laboratory tests to include in the workup. Recognize when to refer a patient to a specialist with a special section on this topic.
