The Course of French History Pierre Goubert,2002-09-11 This stimulating one volume history traces the social and economic evolution of France as a nation from the founding of the monarchy in 987 to the present day Against a background of structural change Goubert etches a vivid account of key events and personalities His perspective is a popular one and his main interest is in how political events and famous people affect the nation as a whole The book incorporates the findings and perspectives of recent monographic studies with clarity and precision but it is Goubert s own judgements direct forceful and iconoclastic which make this an invaluable text **A Commentary on Augustine's De cura pro mortuis gerenda**

Paula Rose,2013-05-16 In *De cura pro mortuis gerenda* Augustine interweaves an assessment of burial near the memorial of a martyr with a series of dream narratives The seeming lack of coherence between argument and narrative in this treatise has puzzled many scholars Combining an analysis of the overall structure of the argument and a detailed philological commentary this study shows that Augustine s text forms a well composed unity The study is based on discourse linguistic and narratological concepts as well as an analysis of the global structure of the narratives Relying on this combined approach Rose demonstrates how Augustine explores the full breadth of his narrative material in the service of his argument In addition this book situates Augustine s text in its cultural historical context

James Watt James Patrick Muirhead,1859 *Archival Afterlives* ,2018-07-10 *Archival Afterlives* explores the posthumous fortunes of scientific and medical archives in early modern Britain If early modern natural philosophers claimed all knowledge as their province theirs was a paper empire But how and why did naturalists engage with archives and in particular with the papers of their dead predecessors This volume makes a firm case for expanding what counts as scientific labour integrating scribes archivist library keepers editors and friends and family of deceased naturalists into the history of

science It shows how early modern natural philosophers pursued new natural knowledge in dialogue with their recent material past Finally it demonstrates the sustaining importance of archival institutions in the growth and development of the New Sciences Contributors are Arnold Hunt Michael Hunter Vera Keller Carol Pal Anna Marie Roos Richard Serjeantson Victoria Sloyan Alison Walker and Elizabeth Yale **The American Journal of the Medical Sciences** ,1869 *Dictionary of National Biography: Neil-Young* Sir Sidney Lee,1912 *Dictionary of National Biography: Neil-Young* ,1912
