1. Open <http://www.colorado.edu/physics/phet/simulations/stringwave/stringWave.swf>
2. Remember to "Download" the simulation if you are on a school computer. You can choose "Run Now" from home.
3. Play with simulation for 5 minutes. What things do you think change the wave shape?
4. Now hit the "reset" button. Make the following changes:
 - Change the option from Manual to Oscillate.
 - Change the end from "fixed end" to "no end".
 - Set the damping to zero.
 - Tension to "high".
5. How does changing the amplitude affect the shape of the wave?
6. How does changing the frequency affect the shape of the wave?
7. You go to the beach on both days of the weekend. On Saturday, the weather is stormy and the waves are hitting the shore very frequently. On Sunday, the weather is calmer.

Draw the Saturday waves with high frequency, high amplitude	Draw the Sunday waves with low frequency, high amplitude
	

8. Check your answers on the next two questions before going on.
 - a. Using the timer, how would measure the frequency of the wave in the simulation?
 - Remember that frequency is # of waves per second. Assume you don't know the number that you set it at.
 - b. How would measure the period of the wave in the simulation?
