Practical Management Science Wayne L. Winston, S. Christian Albright, Mark Nathan Broadie, Lawrence L. Lapin, William D. Whisler, 2006

This text takes an active learning approach providing numerous examples and problems so students can practice extensively with a concept before moving on. Four types of problems: skill building, skill extending, modeling, and cases are graded within sections and chapters to help instructors assign homework. Another important feature is the way that the text integrates modeling into all functional areas of business: finance, marketing, operations, and management, using real examples and real data. The text emphasizes modeling over algebraic formulations and memorization of particular models. Shell files are also provided so that instructors can give students as much or as little information as they need.

Data Analysis and Decision Making S. Christian Albright, Wayne Winston, Christopher Zappe, 2010-10-12
