Wangsness Electromagnetic Fields Solution Chapter 20:

Electromagnetic Fields Roald K. Wangsness, 1986-07-24 This revised edition provides patient guidance in its clear and organized presentation of problems It is rich in variety large in number and provides very careful treatment of relativity One outstanding feature is the inclusion of simple standard examples demonstrated in different methods that will allow students to enhance and understand their calculating abilities There are over 145 worked examples virtually all of the standard problems are included

Modern Optics B. D. Guenther, 2018 Modern Optics is a fundamental study of the principles of optics using a rigorous physical approach based on Maxwell's Equations The treatment provides the mathematical foundations needed to understand a number of applications such as laser optics fiber optics and medical imaging covered in an engineering curriculum as well as the traditional topics covered in a physics based course in optics In addition to treating the fundamentals in optical science the student is given an exposure to actual optics engineering problems such as paraxial matrix optics aberrations with experimental examples Fourier transform optics Fresnel Kirchhoff formulation Gaussian waves thin films photonic crystals surface plasmons and fiber optics Through its many pictures figures and diagrams the text provides a good physical insight into the topics covered The course content can be modified to reflect the interests of the instructor as well as the student through the selection of optional material provided in appendixes
