of LD and ID on learning outcomes and on everyday living What kind of training program is best suited to the promotion of such changes *Improving Our Competitiveness* United States. Congress. House. Committee on Education and Labor, 2010

Application of CFD Techniques Toward the Validation of Nonlinear Aerodynamic Models, 1985 Applications of CFD methods to determine the regimes of applicability of nonlinear models describing the unsteady aerodynamic responses to aircraft flight motions are described The potential advantages of computational methods over experimental methods are discussed and the concepts underlying mathematical modeling are reviewed The economic and conceptual advantages of the modeling procedure over coupled simultaneous solutions of the gasdynamic equations and the vehicle's kinematic equations of motion are discussed The modeling approach when valid eliminates the need for costly repetitive computation of flowfield solutions For the test cases considered the aerodynamic modeling approach is shown to be valid
