Topley & Wilson's Microbiology and Microbial Infections, 1998 Microbiology and Microbial Infections 10e
Parasitology 10e W. W. C. Topley, 2007-04-27 Edited by F E G Cox Derek Wakelin Stephen H Gillespie and Dickson D Despommier Parasitic infections present a major challenge to the health and well being of several billions of people across the world Political unrest natural disasters the migrations of huge populations and the spread of HIV infections have added to already serious problems by increasing global parasite burdens Increasingly it is becoming clear that interactions between parasites and other infectious agents can aggravate disease Against this backdrop progress is being made in the containment of many parasitic infections and there is optimism that some of the diseases that have plagued humans for centuries may be eradicated Hopes for the future revolve around the application of modern molecular genetic and immunological science linked to the systematic use of evidence based control methods All these themes and more run through the chapters in this volume Parasitology has been thoroughly revised and updated for the tenth edition of Topley Wilson's Microbiology and Microbial Infections to include all newly identified parasites and emerging diseases Through discussion of the general aspects of parasitology and detailed reviews of specific organisms grouped under protozoa and helminths the volume provides an authoritative survey of current knowledge of parasitic organisms and the human diseases to which they give rise what their effects are and ways in which they can be controlled not only now but also in the future The comprehensive coverage includes the basic science that underlies disease transmission and progression the classification and identification of the organisms concerned and the epidemiology and treatment of the diseases caused Parasitology is an invaluable companion for infectious disease specialists pathologists parasitologists and all others working in this increasingly important field *Parasites of Homo sapiens* Richard Ashford, William Crewe, 2003-01-23 Homo sapiens rank among the most parasitized of all animals In part this is because we know so much about all aspects of the biology of our species but in addition our varied habitat and diet and our global distribution exposes us to more infections than any other species Whereas some familiar parasitic infections are responsible for much human disease and suffering the great majority are rare or obscure forms ignored by all but the most comprehensive texts The Parasites of Homo sapiens An Annotated checklist of the Protozoa Helminths and Arthropods for Which We Are Home 2nd Edition presents a comprehensive listing of them all Closely following the pattern of the first edition this new edition incorporates a wealth of further information and data from the most recently published research findings An indispensable guide for all parasitologists it presents a comprehensive checklist of all animals naturally parasitic in or on the human body Each parasite listed includes a complete summary of its characteristics The structure of each entry includes The scientific name of the parasite Synonyms for scientific names Status of reported human cases Geographical distribution and abundance Parasite habitat on humans Hosts Transmission mechanisms Human risk factors Indication of host specificity status **Topley & Wilson's Microbiology and Microbial Infections** W.
