Diverse Issues in Higher Education, 2006 *Outsourcing in European Emerging Economies* Łukasz Mamica, 2020-11-29 Drawing on a range of European cases this edited volume analyses the offshoring and outsourcing of foreign companies with a focus on territorial embeddedness The book opens by developing a theoretical framework and then presents a range of international case studies exploring the experiences of the service hub cities of Brno Bratislava Budapest Krakow and Prague Attention is also given to internal and external determinants of embeddedness with chapters on the employee perspective the Fintech industry corporate social responsibility and the role of universities This volume will be of interest to advanced students and researchers in regional economics economic geography innovation studies industrial economics European economics and international business How to Fulfil the UN Sustainability Goals Felix Fuders, 2023-10-11 This book combines the field of economics especially monetary theory with other disciplines like ecology physics humanities social sciences and development theory This transdisciplinary approach makes the book a unique contribution for researchers students policy makers and professionals working in governmental or nongovernmental institutions as well as anyone interested in society's well being and achieving a true social ecological transformation It is written in an accessible language in order to reach a broad audience In 2015 more than 190 world leaders recognized that the world is on a collision course Max Neef and committed to 17 Sustainable Development Goals SDGs Many conferences and high level meetings have been held since then and one of the most frequently discussed topics is how to finance these goals There is a widespread belief that coming up with more money for sustainable development will do the trick Usually the discussions focus on finding additional financial resources in order to achieve the goals faster In this book it is argued that not only is more money needed but it needs to be a different kind of money The book demonstrates that ALL but one of the SDGs are directly linked to our monetary system which being completely unnatural can be seen as the most important but at the same time least recognized reason for market failure Many people think we just need to do more faster better Very few say that we have done things fundamentally wrong and that the institutions and values which motivated us to do those things need to be changed It will be concluded that only if we change our unnatural design of money to a more natural one will we be able to reach these goals
