

Concept 10.

1. In the diagram, the shaded region represents the set of all points satisfying condition 1. Since the line segment is shaded, we know that the shaded region is the set of all points that are equidistant from the two points A and B. This is a line segment perpendicular to the line segment AB and passing through its midpoint.

2. The shaded region is the set of all points that are equidistant from the two points A and B. This is a line segment perpendicular to the line segment AB and passing through its midpoint.

Concept 11.

1. The point A is at 1, B is at 3, and C is at 5. The segment between B and C is shaded. This represents the set of points that are equidistant from A and B.
