Chapter 02

Cost Terminology and Cost Behaviors

Lecture Outline

LO.1 Why are costs associated with a cost object?

A. Introduction

1. This chapter provides the necessary terminology to understand and communicate cost and management accounting information. The chapter also presents cost flows and the process of cost accumulation in a production environment.
2. To effectively communicate information, accountants must clearly understand the differences among the various types of costs, their computations, and their usage.
3. To be useful, the term cost must be defined more specifically before “the cost” of a product or service can be determined and communicated to others.
 - a. **Cost** reflects the monetary measure of resources given up to attain an objective such as making a good or delivering a service.
 - b. **Unexpired cost:** The portion of an asset’s value that has not yet been consumed or sacrificed and which is reported on the balance sheet as an asset.
 - c. **Expired cost:** The portion of an asset’s value that has been consumed or sacrificed during the period and which is reported as an expense on the income statement.

B. Cost Terminology

1. A **cost management system** is a set of formal methods developed for planning and controlling an organization’s cost-generating activities relative to its strategy, goals, and objectives.
2. Some important types of costs are summarized in text **Exhibit 2–1 (p. 25)**.
3. Association with Cost Object
 - a. A **cost object** is anything (e.g., a product, a product line, a customer) for which management wants to collect or accumulate costs.
