China's Digital Nationalism Florian

Schneider, 2018-08-16 Nationalism in China as much as elsewhere is today adopted, filtered, transformed, enhanced and accelerated through digital networks. And as we have increasingly seen, nationalism in digital spheres interacts in complicated ways with nationalism on the ground. If we are to understand the social and political complexities of the twenty-first century, we need to ask what happens to nationalism when it goes digital. In *China's Digital Nationalism*, Florian Schneider explores the issue by looking at digital China first hand, exploring what search engines, online encyclopedias, websites, hyperlink networks and social media can tell us about the way that different actors construct and manage a crucial topic in contemporary Chinese politics: the protracted historical relationship with neighbouring Japan. Using two cases, the infamous Nanjing Massacre of 1937 and the ongoing disputes over islands in the East China Sea, Schneider shows how various stakeholders in China construct networks and deploy power to shape nationalism for their own ends. These dynamics provide crucial lessons on how nation states adapt to the shifting terrain of the digital age and highlight how digital nationalism is today an emergent property of complex communication networks.

Brand New China Jing

Wang, 2010-04-10 One part riveting account of fieldwork and one part rigorous academic study, *Brand New China* offers a unique perspective on the advertising and marketing culture of China. Jing Wang's experiences in the disparate worlds of Beijing advertising agencies and the U.S. academy allow her to share a unique perspective on China during its accelerated reintegration into the global market system. *Brand New China* offers a detailed, penetrating and up-to-date portrayal of branding and advertising in contemporary China. Wang takes us inside an advertising agency to show the influence of American branding theories and models. She also examines the impact of new media practices on Chinese advertising, deliberates on the convergence of grassroots creative culture and viral marketing strategies, samples successful advertising campaigns, provides practical insights about Chinese consumer segments and offers methodological reflections on pop culture and advertising research. This book unveils a brand new China that is under the sway of the ideology of global partnership while struggling not to become a mirror image of the United States. Wang takes on the task of showing where Western thinking works in China, where it does not and perhaps most important, where it creates opportunities for cross-fertilization. Thanks to its combination of engaging vignettes from the advertising world and thorough research that contextualizes these vignettes, *Brand New China* will be of interest to industry participants, students of popular culture and the general reading public interested in learning about a rapidly transforming Chinese society.
