*Supplier Relationship Management in an AI enabled Supply Chain* Neji Isaac, 2025-08-28 Doctoral Thesis Dissertation from the year 2025 in the subject Business economics Customer Relationship Management CRM grade B language English abstract Supplier Relationship Management SRM is pivotal to

modern manufacturing supply chains enabling operational success within intricate supplier networks Yet traditional SRM reliant on manual and reactive processes falters amid global economic volatility as evidenced by disruptions like the COVID 19 pandemic and the 2021 Suez Canal obstruction Artificial Intelligence AI offers transformative potential to advance SRM fostering proactive resilient and collaborative frameworks However its adoption poses challenges including high costs privacy concerns algorithmic bias and risks to trust which can undermine its efficacy This dissertation investigates how AI can be strategically integrated into SRM to enhance manufacturing supply chains while balancing technological innovation with relational and ethical considerations This dissertation advances supply chain management by redefining SRM through a strategic AI enabled lens offering scholars a theoretical extension and practitioners an actionable roadmap It bridges operational efficiency with relational trust addressing ethical gaps though achieving full equity requires further exploration Limitations including partial reliance on primary data and a manufacturing focus are mitigated by recommendations for future research such as quantitative validation and cross sectoral applications Ultimately this study positions SRM as a proactive discipline in an AI driven era providing a robust foundation for navigating supply chain complexity
