Neural Networks in Optimization Xiang-Sun Zhang, 2013-03-09 People are facing more and more NP complete or NP hard problems of a combinatorial nature and of a continuous nature in economic military and management practice There are two ways in which one can enhance the efficiency of searching for the solutions of these problems The first is to improve the speed and memory capacity of hardware We all have witnessed the computer industry's amazing achievements with hardware and software developments over the last twenty years On one hand many computers bought only a few years ago are being sent to elementary schools for children

to learn the ABC s of computing On the other hand with economic scientific and military developments it seems that the increase of intricacy and the size of newly arising problems have no end We all realize then that the second way to design good algorithms will definitely compensate for the hardware limitations in the case of complicated problems It is the collective and parallel computation property of artificial neural net works that has activated the enthusiasm of researchers in the field of computer science and applied mathematics It is hard to say that artificial neural networks are solvers of the above mentioned dilemma but at least they throw some new light on the difficulties we face We not only anticipate that there will be neural computers with intelligence but we also believe that the research results of artificial neural networks might lead to new algorithms on von Neumann s computers

Metaheuristic Procedures for Training Neural Networks Enrique Alba,Rafael Martí,2006-08-25 Metaheuristic Procedures For Training Neural Networks provides successful implementations of metaheuristic methods for neural network training Moreover the basic principles and fundamental ideas given in the book will allow the readers to create successful training methods on their own Apart from Chapter 1 which reviews classical training methods the chapters are divided into three main categories The first one is devoted to local search based methods including Simulated Annealing Tabu Search and Variable Neighborhood Search The second part of the book presents population based methods such as Estimation Distribution algorithms Scatter Search and Genetic Algorithms The third part covers other advanced techniques such as Ant Colony Optimization Co evolutionary methods GRASP and Memetic algorithms Overall the book s objective is engineered to provide a broad coverage of the concepts methods and tools of this important area of ANNs within the realm of continuous optimization

Artificial Neural Networks for Engineers and Scientists S. Chakraverty, Susmita Mall, 2017-07-20 Differential equations play a vital role in the fields of engineering and science Problems in engineering and science can be modeled using ordinary or partial differential equations Analytical solutions of differential equations may not be obtained easily so numerical methods have been developed to handle them Machine intelligence methods such as Artificial Neural Networks ANN are being used to solve differential equations and these methods are presented in Artificial Neural Networks for Engineers and Scientists Solving Ordinary Differential Equations This book shows how computation of differential equation becomes faster once the ANN model is properly developed and applied
