technologies inequalities in healthcare persist Life and illness play out in the gap between visualized bodies and ideological notions of health and disease This publication brings together perspectives from art history visual science studies science and technology studies sociology and cultural anthropology to encounter watercolours sculpture comics advertising and infographics Images are a primary way of recognizing the body but they inevitably promise too much and disappoint us in our quest for bodily self control The collection brings together epistemology medicine and art to understand what biomedicine looks like and how we might view it differently in the past and in the future **Whitaker's Cumulative Book List** ,1975
