The Mechanics of Securitization Suleman Baig,Moorad Choudhry,2013-01-09 A step by step guide to implementing and closing securitization transactions Securitization is still in wide use despite the

reduction in transactions The reality is that investors and institutions continue to use this vehicle for raising funds and the demand for their use will continue to rise as the world's capital needs increase The Mechanics of Securitization specifically analyzes and describes the process by which a bank successfully implements and closes a securitization transaction in the post subprime era This book begins with an introduction to asset backed securities and takes you through the historical impact of these transactions including the implications of the recent credit crisis and how the market has changed Discusses in great detail rating agency reviews liaising with third parties marketing the deals and securing investors Reviews due diligence and cash flow analysis techniques Examines credit and cash considerations as well as how to list and close deals Describes the process by which a bank will structure and implement the deal and how the process is project managed and tested across internal bank departments While securitization transactions have been taking place for over twenty five years there is still a lack of information on exactly how they are processed successfully This book will put you in a better position to understand how it all happens and show you how to effectively implement an ABS transaction yourself **Evaluation**

Management in South Africa and Africa Fanie Cloete, Babette Rabie, Christo De Coning, 2014-12-01 This blind peer reviewed book systematically records analyses and assesses for the first time in a single volume the implications of the global development and management of professional evaluation for the African continent The book deals with the most strategic contemporary evaluation themes Each of these themes contains discussions of theoretical issues illustrated with one or more short case studies while selected longer case studies and other relevant documentation are also taken up in annexures at the end of the book The book therefore comprises a guide to best M E practices for purposes of systematic policy programme and project evaluations It is suitable for both professional M E institutionalisation and capacity building projects as well as for evaluation information dissemination and education at different levels in the public private and voluntary sectors in society especially in a developmental context Capturing Value in Digital Health Eco-Systems Felix Lena Stephanie, Ravi S.

Sharma, 2021-11-10 The United Nations Sustainable Development Goals call for the establishment of Good Health and Well being and target a universal digital healthcare ecosystem by 2030 However existing technology infrastructure is ineffectual in achieving the envisioned target and requires massive reconfiguration to achieve its intended outcome This book suggests a way forward with fair and efficient digital health networks that provide resource efficiencies and inclusive access to those who are currently underserved Specifically a fair and efficient digital health network that provides a common platform to its key stakeholders to facilitate sharing of information with a view to promote cooperation and maximise benefits A promising platform for this critical application is cloud technology with its offer of computing as a utility and resource sharing This is an area that has attracted much scholarly attention as it is well suited to foster such a network and bring together diverse players who would otherwise remain fragmented and be unable to reap the benefits that accrue from cooperation The fundamental premise is that the notion of value in a digital health ecosystem is brought about by the sharing and exchange of

digital information However notwithstanding the potential of information and communication technology to transform the healthcare industry for the better there are several barriers to its adoption the most significant one being misaligned incentives for some stakeholders This book suggests among other findings that e health in its true sense can become fair and efficient if and only if a regulatory body concerned assumes responsibility as the custodian of its citizens health information so that collaboration for value will replace competition for revenue as the new axiom in delivering the public good of healthcare through digital networks
