police and local officials were frustrated cowed and hobbled by shrinking budgets One of the men took out a rifle and fired four shots at Boudreau and his boat Was the Boudreau killing cold blooded murder a direct reaction to credible threats or the tragic result of local officials failing to protect the community As many local people have said if those fellows hadn t killed him someone else would have

The Euro Trap Hans-Werner Sinn,2014-07-31 This book offers a critical assessment of the history of the euro its crisis and the rescue measures taken by the European Central Bank and the community of states The euro induced huge capital flows from the northern to the southern countries of the Eurozone that triggered an inflationary credit bubble in the latter deprived them of their competitiveness and made them vulnerable to the financial crisis that spilled over from the US in 2007 and 2008 As private capital shied away from the southern countries the ECB helped out by providing credit from the local money printing presses The ECB became heavily exposed to investment risks in the process and subsequently had to be bailed out by intergovernmental rescue operations that provided replacement credit for the ECB credit which itself had replaced the dwindling private credit The interventions stretched the legal structures stipulated by the Maastricht Treaty which in the absence of a European federal state had granted the ECB a very limited mandate These interventions created a path dependency that effectively made parliaments vicarious agents of the ECB s Governing Council This book describes what the author considers to be a dangerous political process that undermines both the market economy and democracy without solving southern Europe s competitiveness problem It argues that the Eurozone has to rethink its rules of conduct by limiting the role of the ECB exiting the regime of soft budget constraints and writing off public and bank debt to help the crisis countries breathe again At the same time the Eurosystem should become more flexible by offering its members the option of exiting and re entering the euro something between the dollar and the Bretton Woods system until it eventually turns into a federation with a strong political power centre and a uniform currency like the dollar

S. V. Bandara, Karine Ravienna, 2024-04-19 Major neurocognitive disorders are one of the leading causes of disability and dependency among the elderly worldwide. Notably, their far-reaching impact extends beyond the estimated 50 million people currently living with a major neurocognitive disorder. As the conversion to Alzheimer's disease (AD) progresses, patients' symptoms, e.g., memory loss, severe impairments in thinking and behavior, place a heavy toll on their caregivers, family, and friends who face emotional frustration coupled with great financial stress. Furthermore, in terms of global cost estimation, the World Health Organization predicted that by 2030 the treatment of patients with AD and other forms of acquired cognitive impairment will cost the
