Police Theory in America Robert C. Wadman, 2009. Measurement of effective policing is based on a quick response to crime that has already been committed; the value of crime prevention has become an afterthought in America's police departments. The middle chapters outline these issues and identify the strategies to improve police community relationships and adjust the measurements for effective policing. The concluding chapters identify strategies designed to facilitate police department organizational change. Using terms from the discipline of economics, a micro strategy and a macro strategy are outlined. A new theory of policing concludes the book. The book is intended primarily as a textbook for criminal justice students but it will also prove useful to police departments, police academies, city managers, and elected officials responsible for police administration and community safety.

Book Jacket ***Taking Sides*** James William Noll, 1997. This debate style reader is designed to introduce students to controversies in education. The issues reflect viewpoints on fundamental issues such as: should school attendance be compelled? Can charter schools revitalize public education and do school uniforms promote safety and improve discipline?
