The TASCAM 2488 brings the hit-making power of 24-track recording and mixing home to musicians everywhere. With an incredible 24 tracks of recording – the same format used by professional studios and big-name rock bands – artists can create the full arrangements listeners are used to hearing. And with its built-in 36-channel mixing console, MIDI tone generator, great-sounding effects and built-in CD-RW, the 2488 provides all of the tools you need to create pro-quality CDs.

For many artists, 8 or 16 tracks isn't enough. Popular music these days is layered with dozens of loops, guitar overdubs, synths and effects. The 2488's 24 recording tracks give you the flexibility to layer guitars or experiment with new sounds. And since all 24 tracks record at full 24-bit resolution, you don't need to trade off your track count for the best sound quality.

The 2488 can record 8 inputs simultaneously to its 40GB* hard disk. The four XLR jacks with phantom power welcome high-quality condenser microphones, and four additional 1/4" TRS mic/line inputs are also provided. The 2488 also has a pair of digital inputs and outputs for connecting to computers and digital effects.

When even 24 tracks isn't enough, like when you want to try a vocal performance over and over, the 2488 has 250 virtual tracks so you don't need to record over previous takes.

A 36-part, 64-voice MIDI tone generator is provided for adding synths and

drums to your arrangements. A MIDI sequence player is also included, so you can import Standard MIDI Files.

The extensive 36-channel mixer allows you to mixdown all 24 tracks, the tone generator, the effects, and the eight inputs. A 3-band EQ and three aux sends are available on all input, track and tone generator channels. The internal processor adds effects like reverb, delay, chorus and more to polish your tracks. Up to eight dynamics insert ef-

fects are provided to add compression while recording or mixing, and guitar FX and stereo mix compression are also available.

When your mix is complete, the built-in CD-RW drive writes your mix to a CD. Premastering and finalize functions help you to ensure that your mixes sound their best before burning. The 2488's high-speed USB 2.0 port – backwards compatible with standard USB 1.1 – can also be used to import and export WAV files or transfer your tracks and mixes to a computer without using a CD, so that your final mixes can be mastered on computer or uploaded for distribution.
